

More comfort, more savings,  
less energy

## "EasyPelt" radiator valve

Without batteries, for even more savings.

Save up to  
**40%**  
on your heating expenses\*

With the EasyPelt valve, combined with your Snugr heating management and optimization system, reduce your building's maintenance needs while ensuring the comfort of its occupants.

### Advantages:

No batteries - Ecological

Power supply via the "Peltier effect":  
converts the temperature difference between the heating  
circuit and the ambient air into energy.

No installation work required

Reduces the risk of blocked valve bodies:  
Regular opening and closing to prevent stuck pin

No maintenance, 365 days / year

Designed for public buildings  
Inactive buttons after installation  
Solid, composed mainly of aluminum

Standard EnOcean communication protocol :  
Almost zero impact of radio emissions on the environment.

Silent: < 30 dB(A)

Communication delay:  
< 10ms every 10 min - 868.3 MHz

Dimensions: ø 55 x 95 mm deep

Thermostatic valve compatibility  
M30x1.5 - Adapters available for other models

\* With a Snugr heating management and optimization system.  
The energy savings achieved depend on the insulation of the building, the existing heating system and the occupants' heating habits.
