

ECCO CAR

**We are Urban
We are Efficient
We are The Future**

Innovate in the way you move.

Connect. Freedom. Urban.
Efficiency. Saving. Electric.

01. White Label App

02. To the connected vehicle & Platform

03. Planning

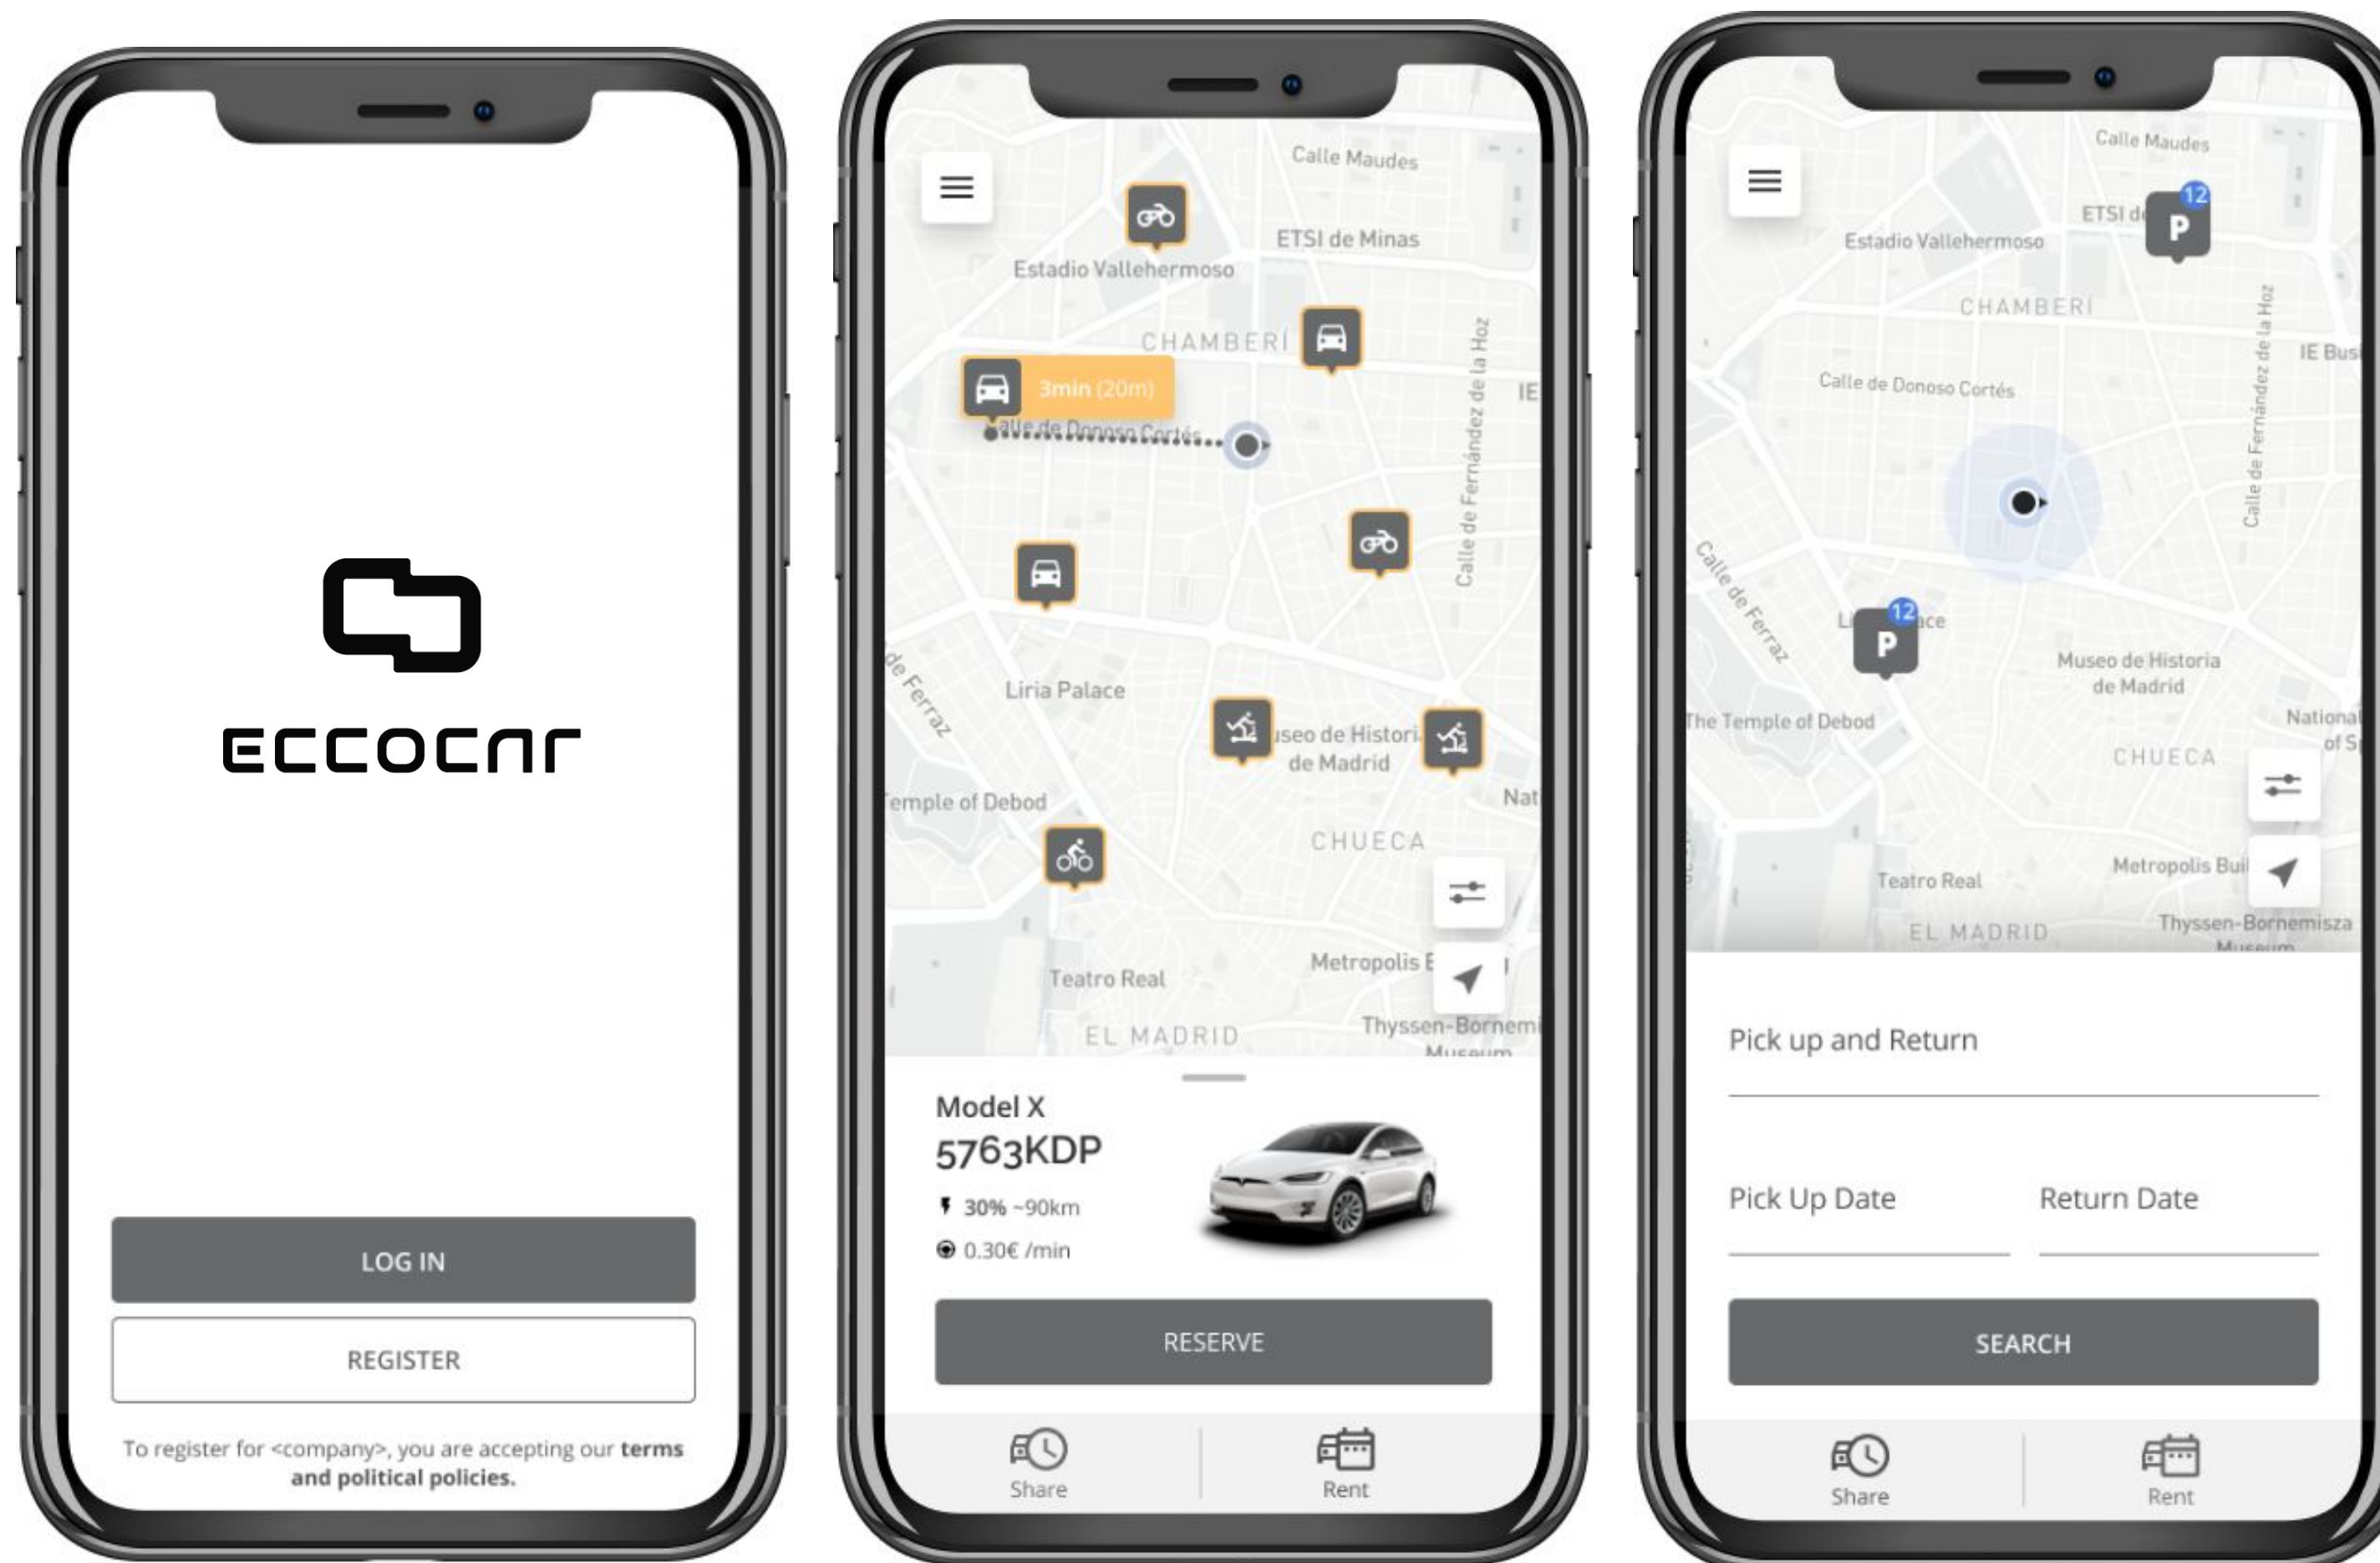

An aerial photograph of a winding asphalt road on a steep, forested mountain slope. The road features several sharp, hairpin turns. The surrounding landscape is covered in dense green trees, with some rocky outcrops and patches of snow or light-colored soil visible. The overall scene is captured from a high angle, looking down at the road as it curves through the terrain.

01. White label App

01. White label App

Available in iOS and Android.

Through this App, your customers will be able to access the fleet available and select the dates of their reservation through two experiences...

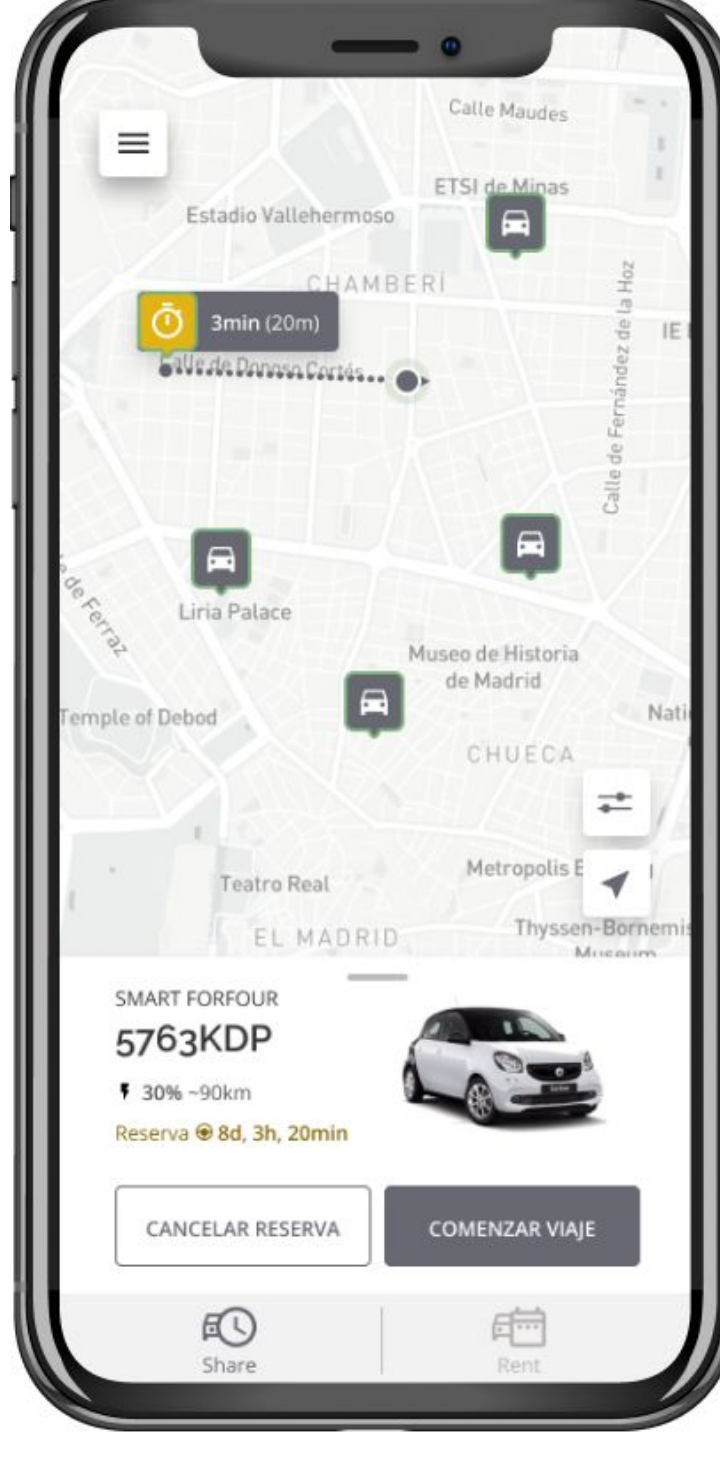

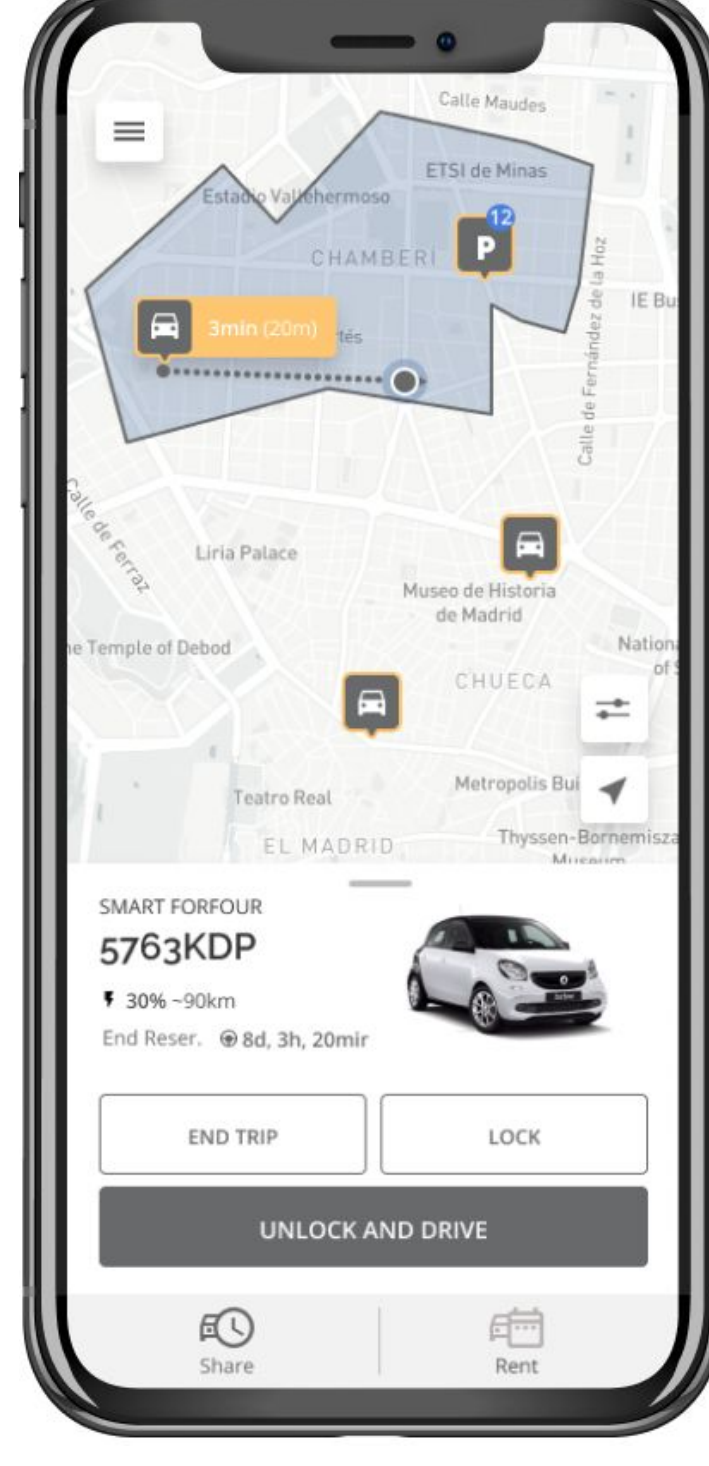

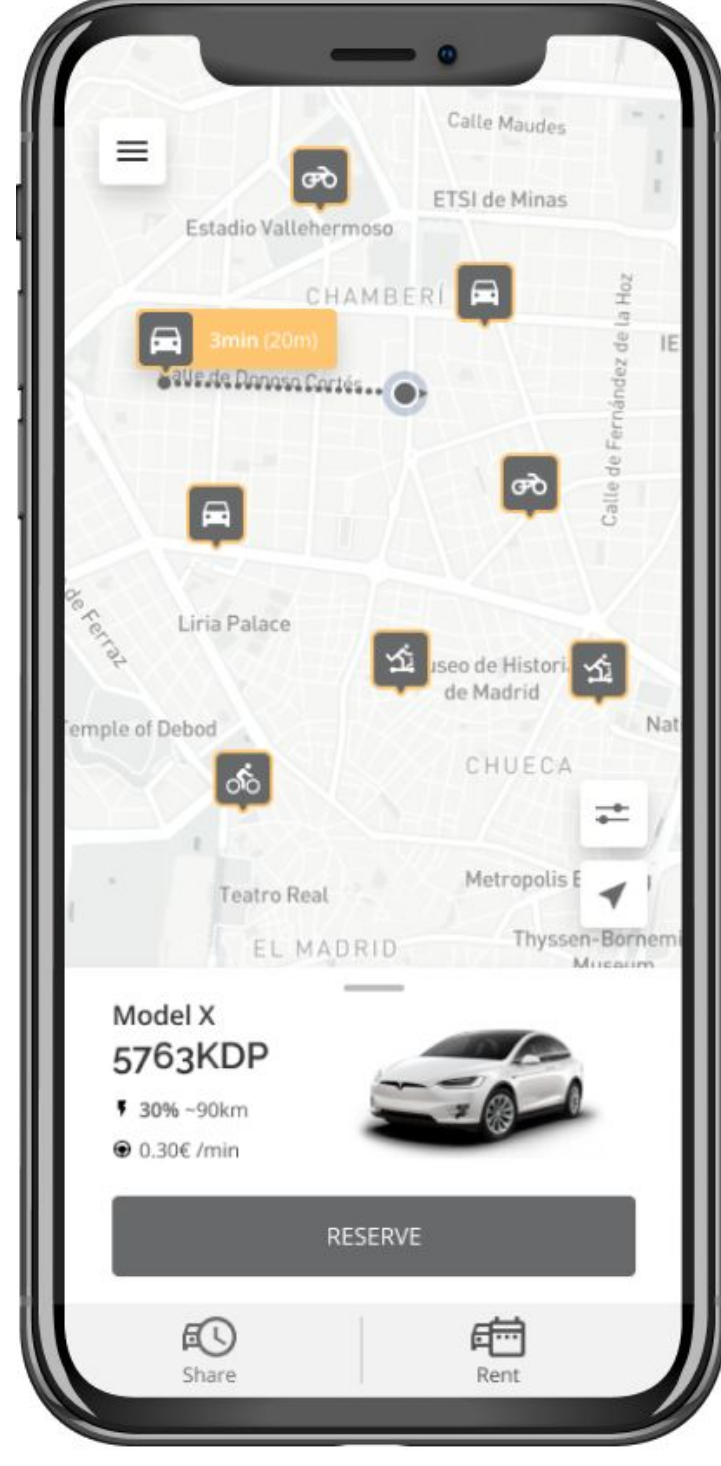

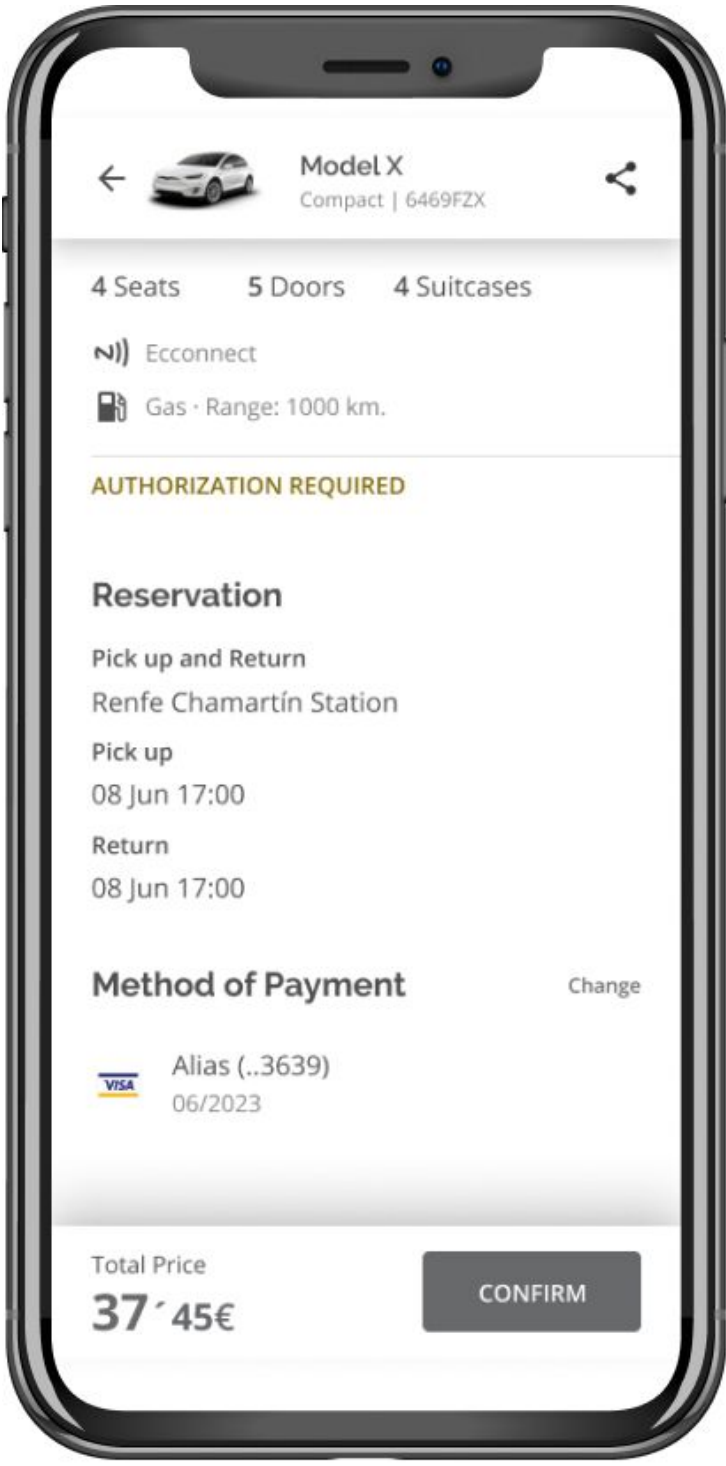

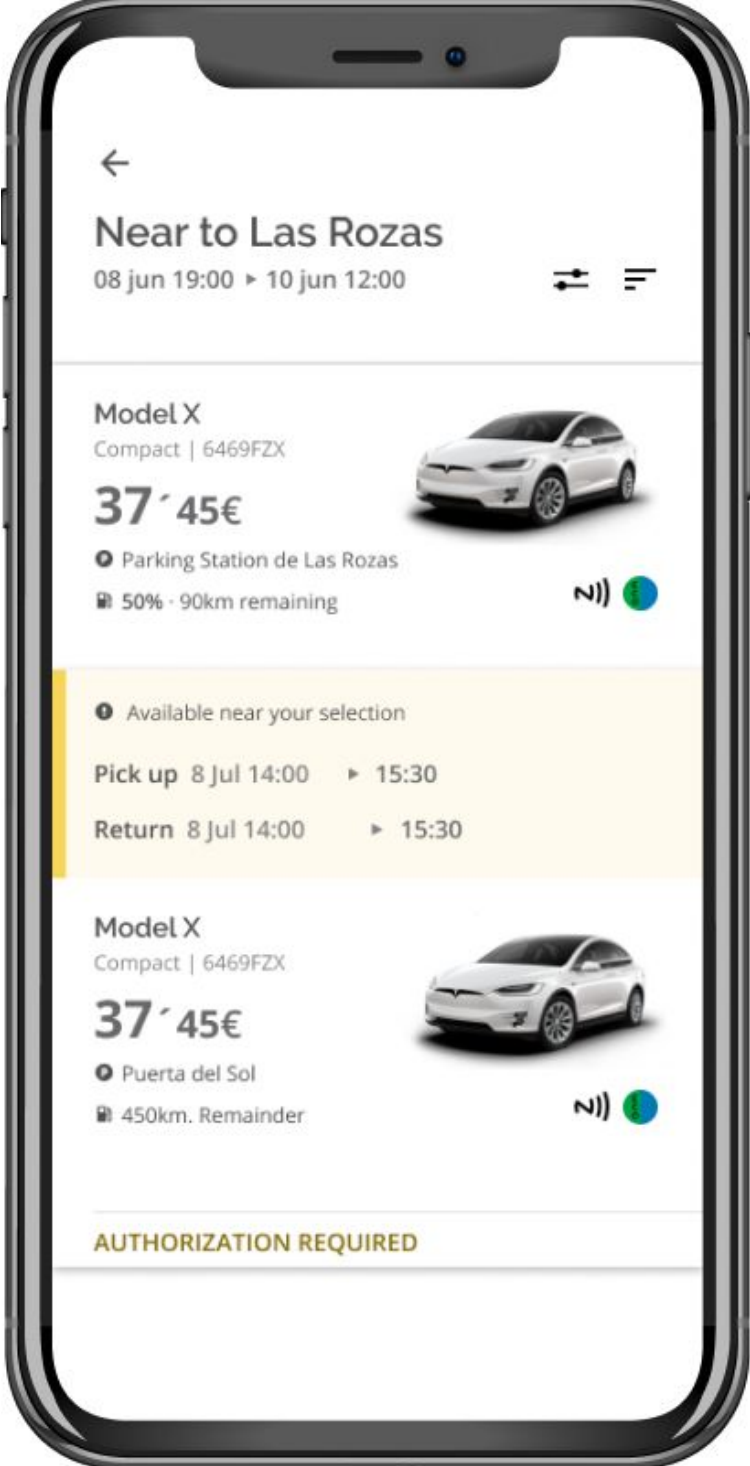

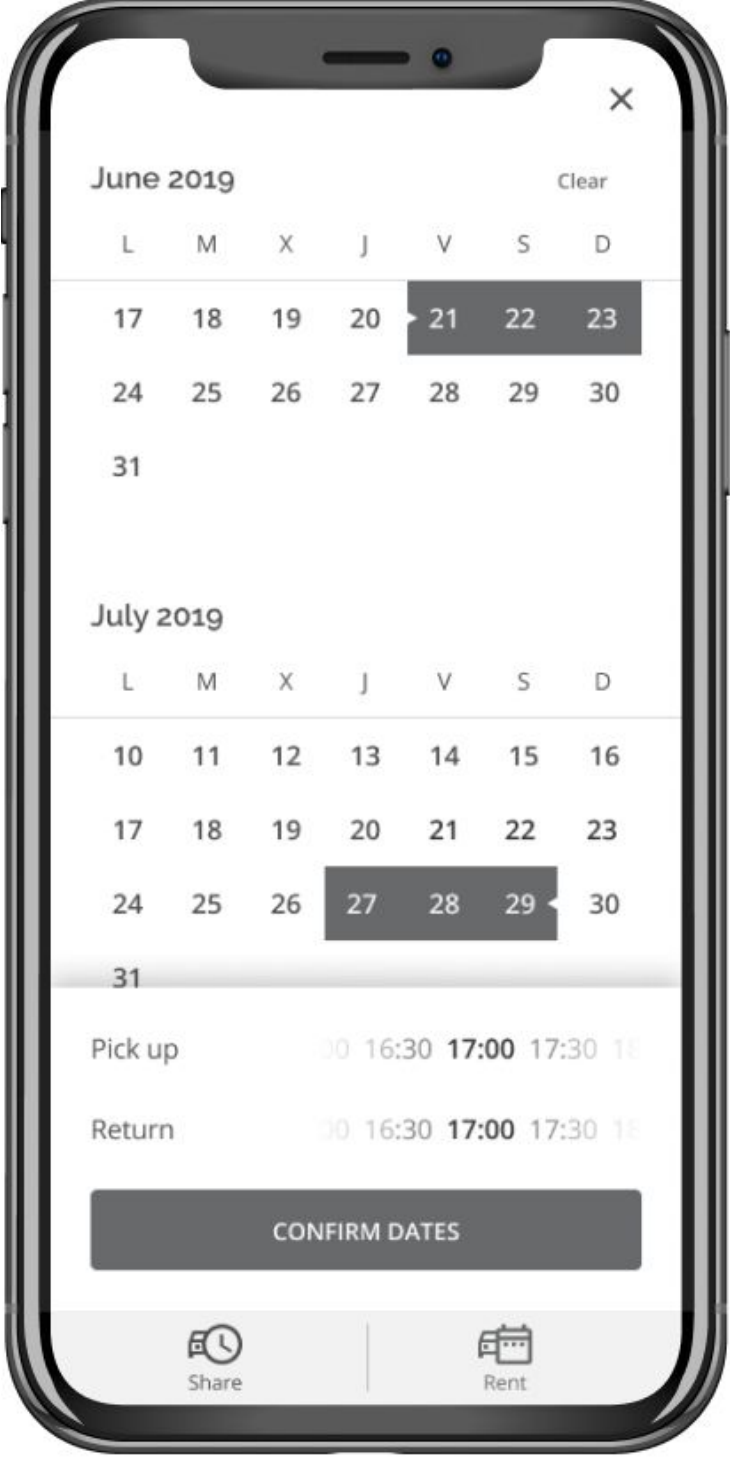

Multimodal Platform

RENT

Renting base2base by minutes/hours/days

SHARE

Renting Free Floating by minutes

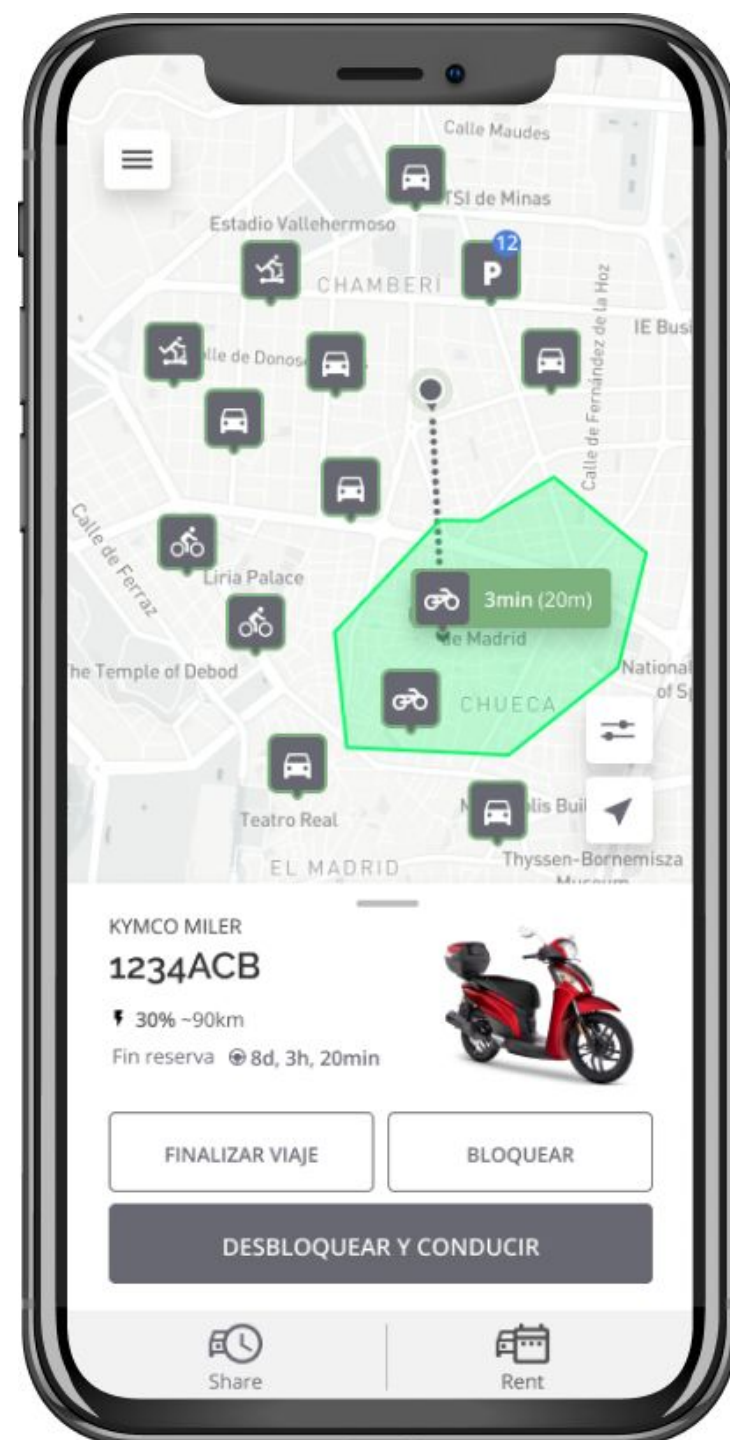

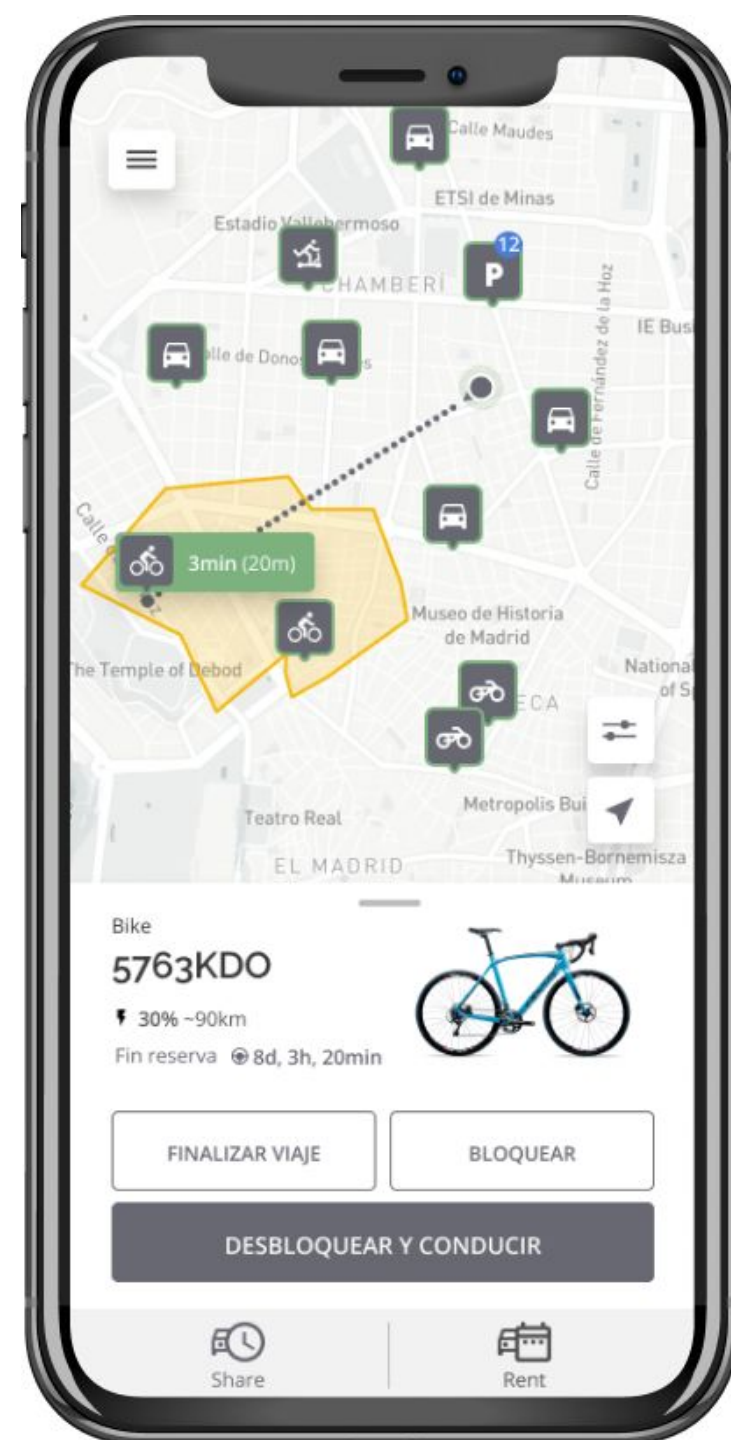

Solutions

To the connected vehicle

Multiple vehicles:

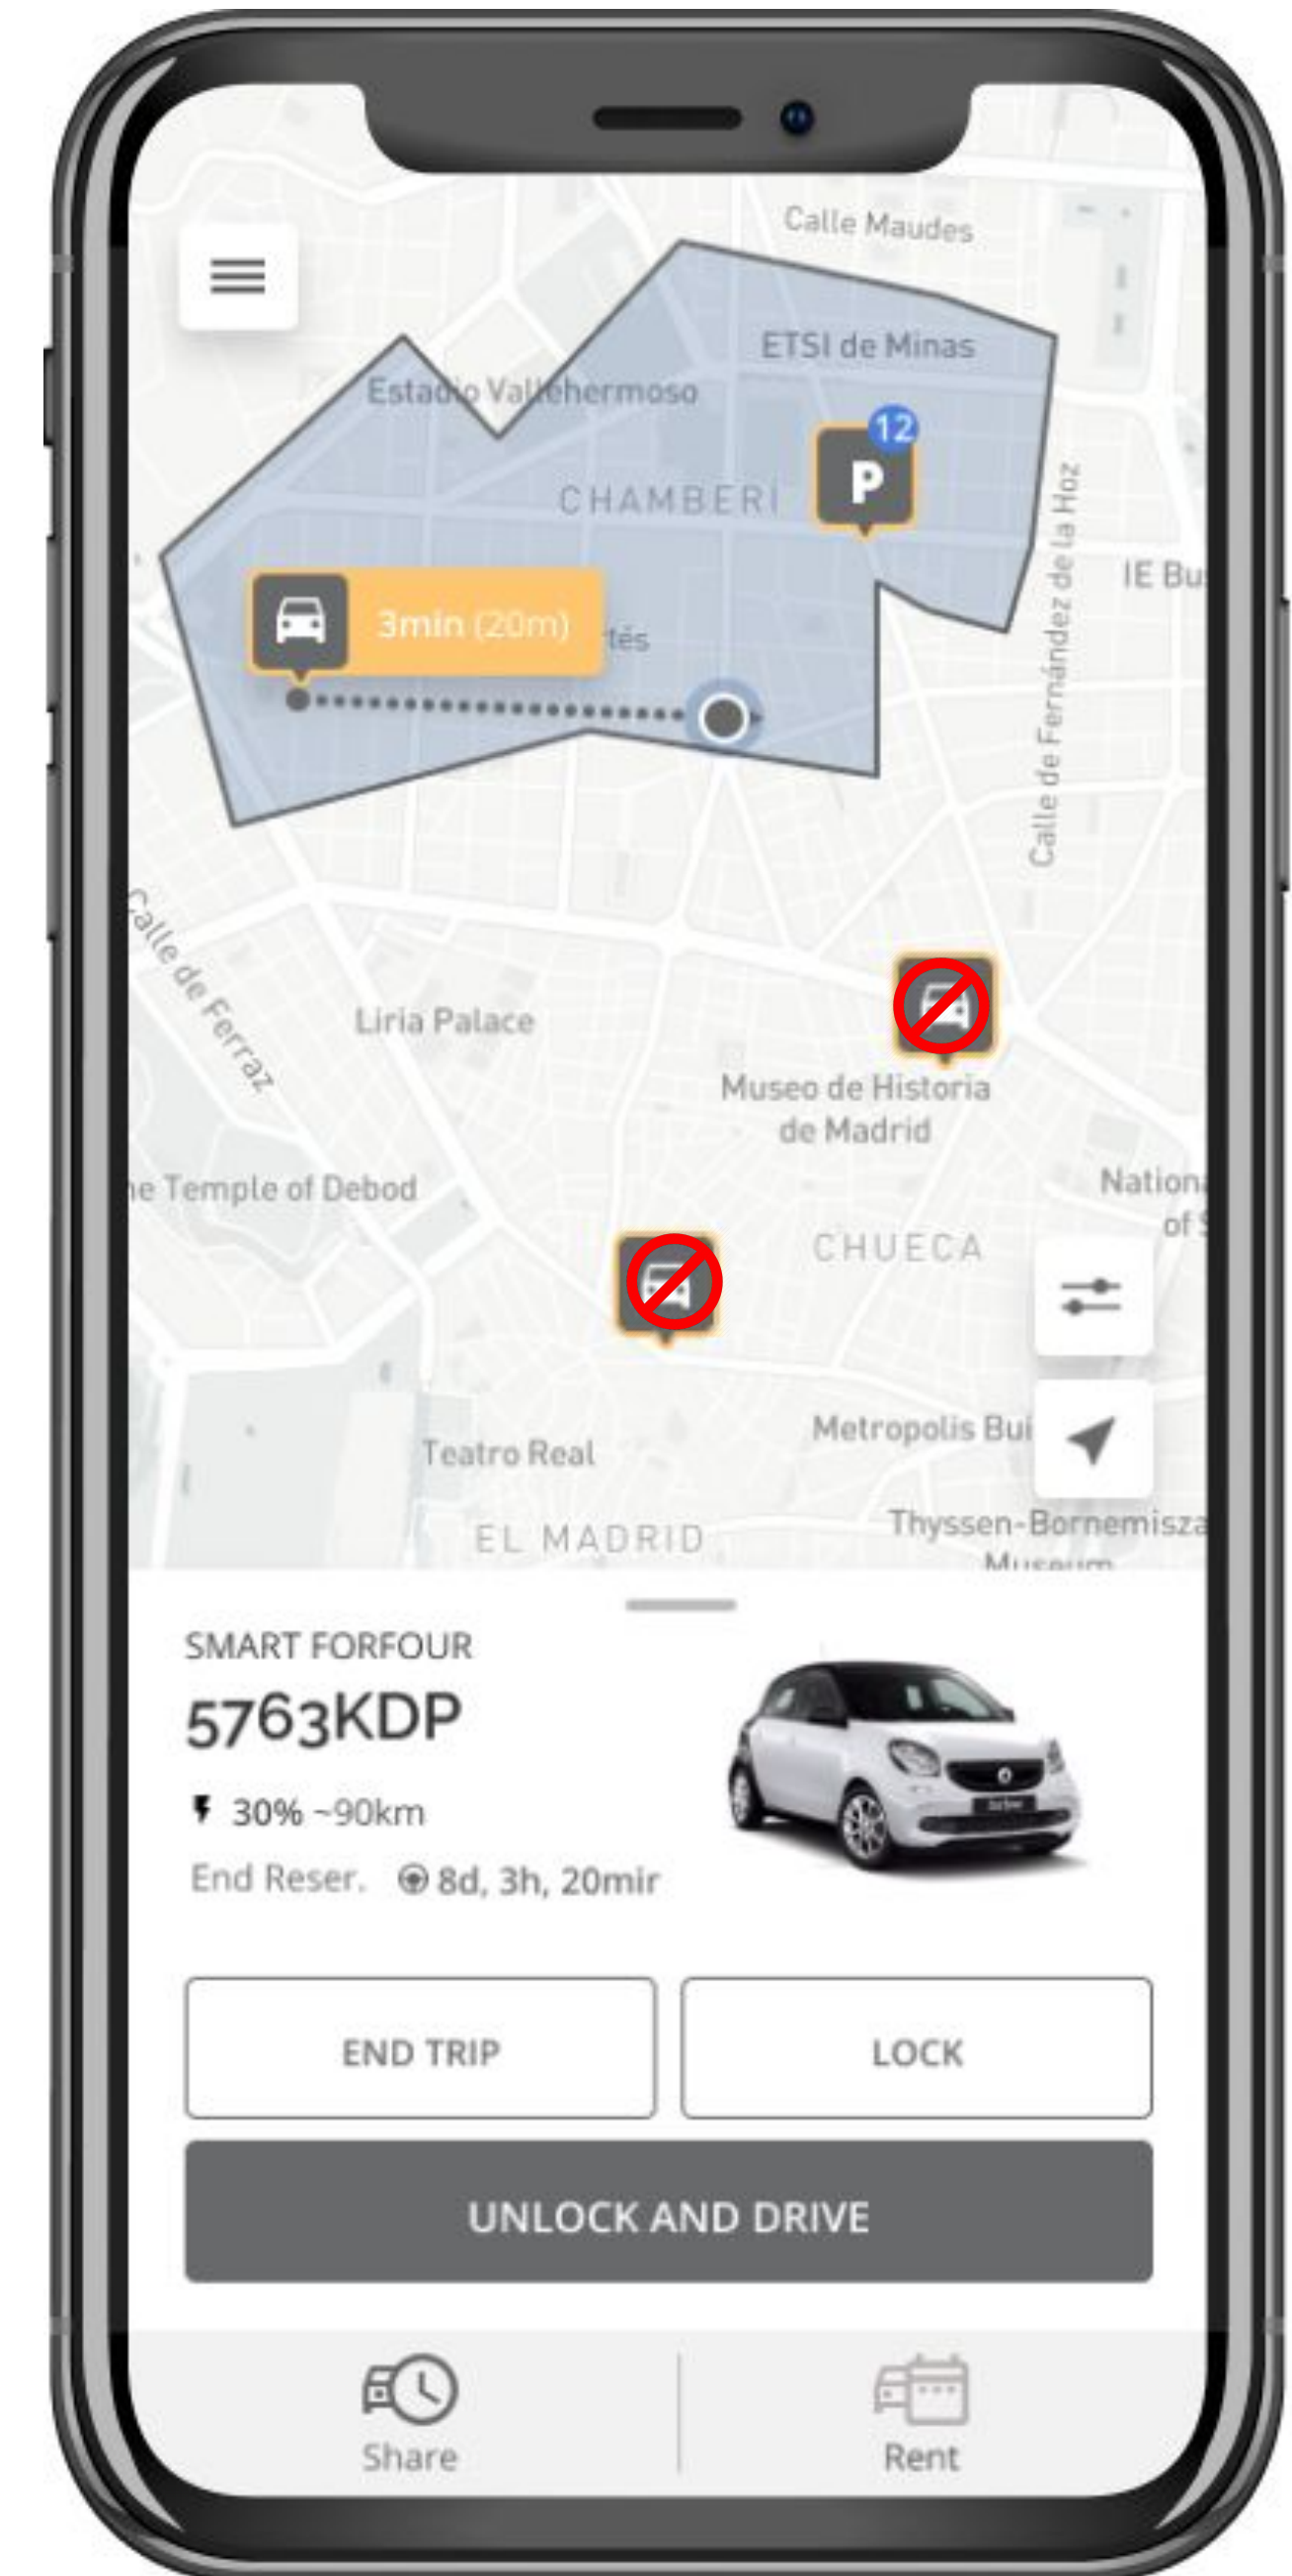

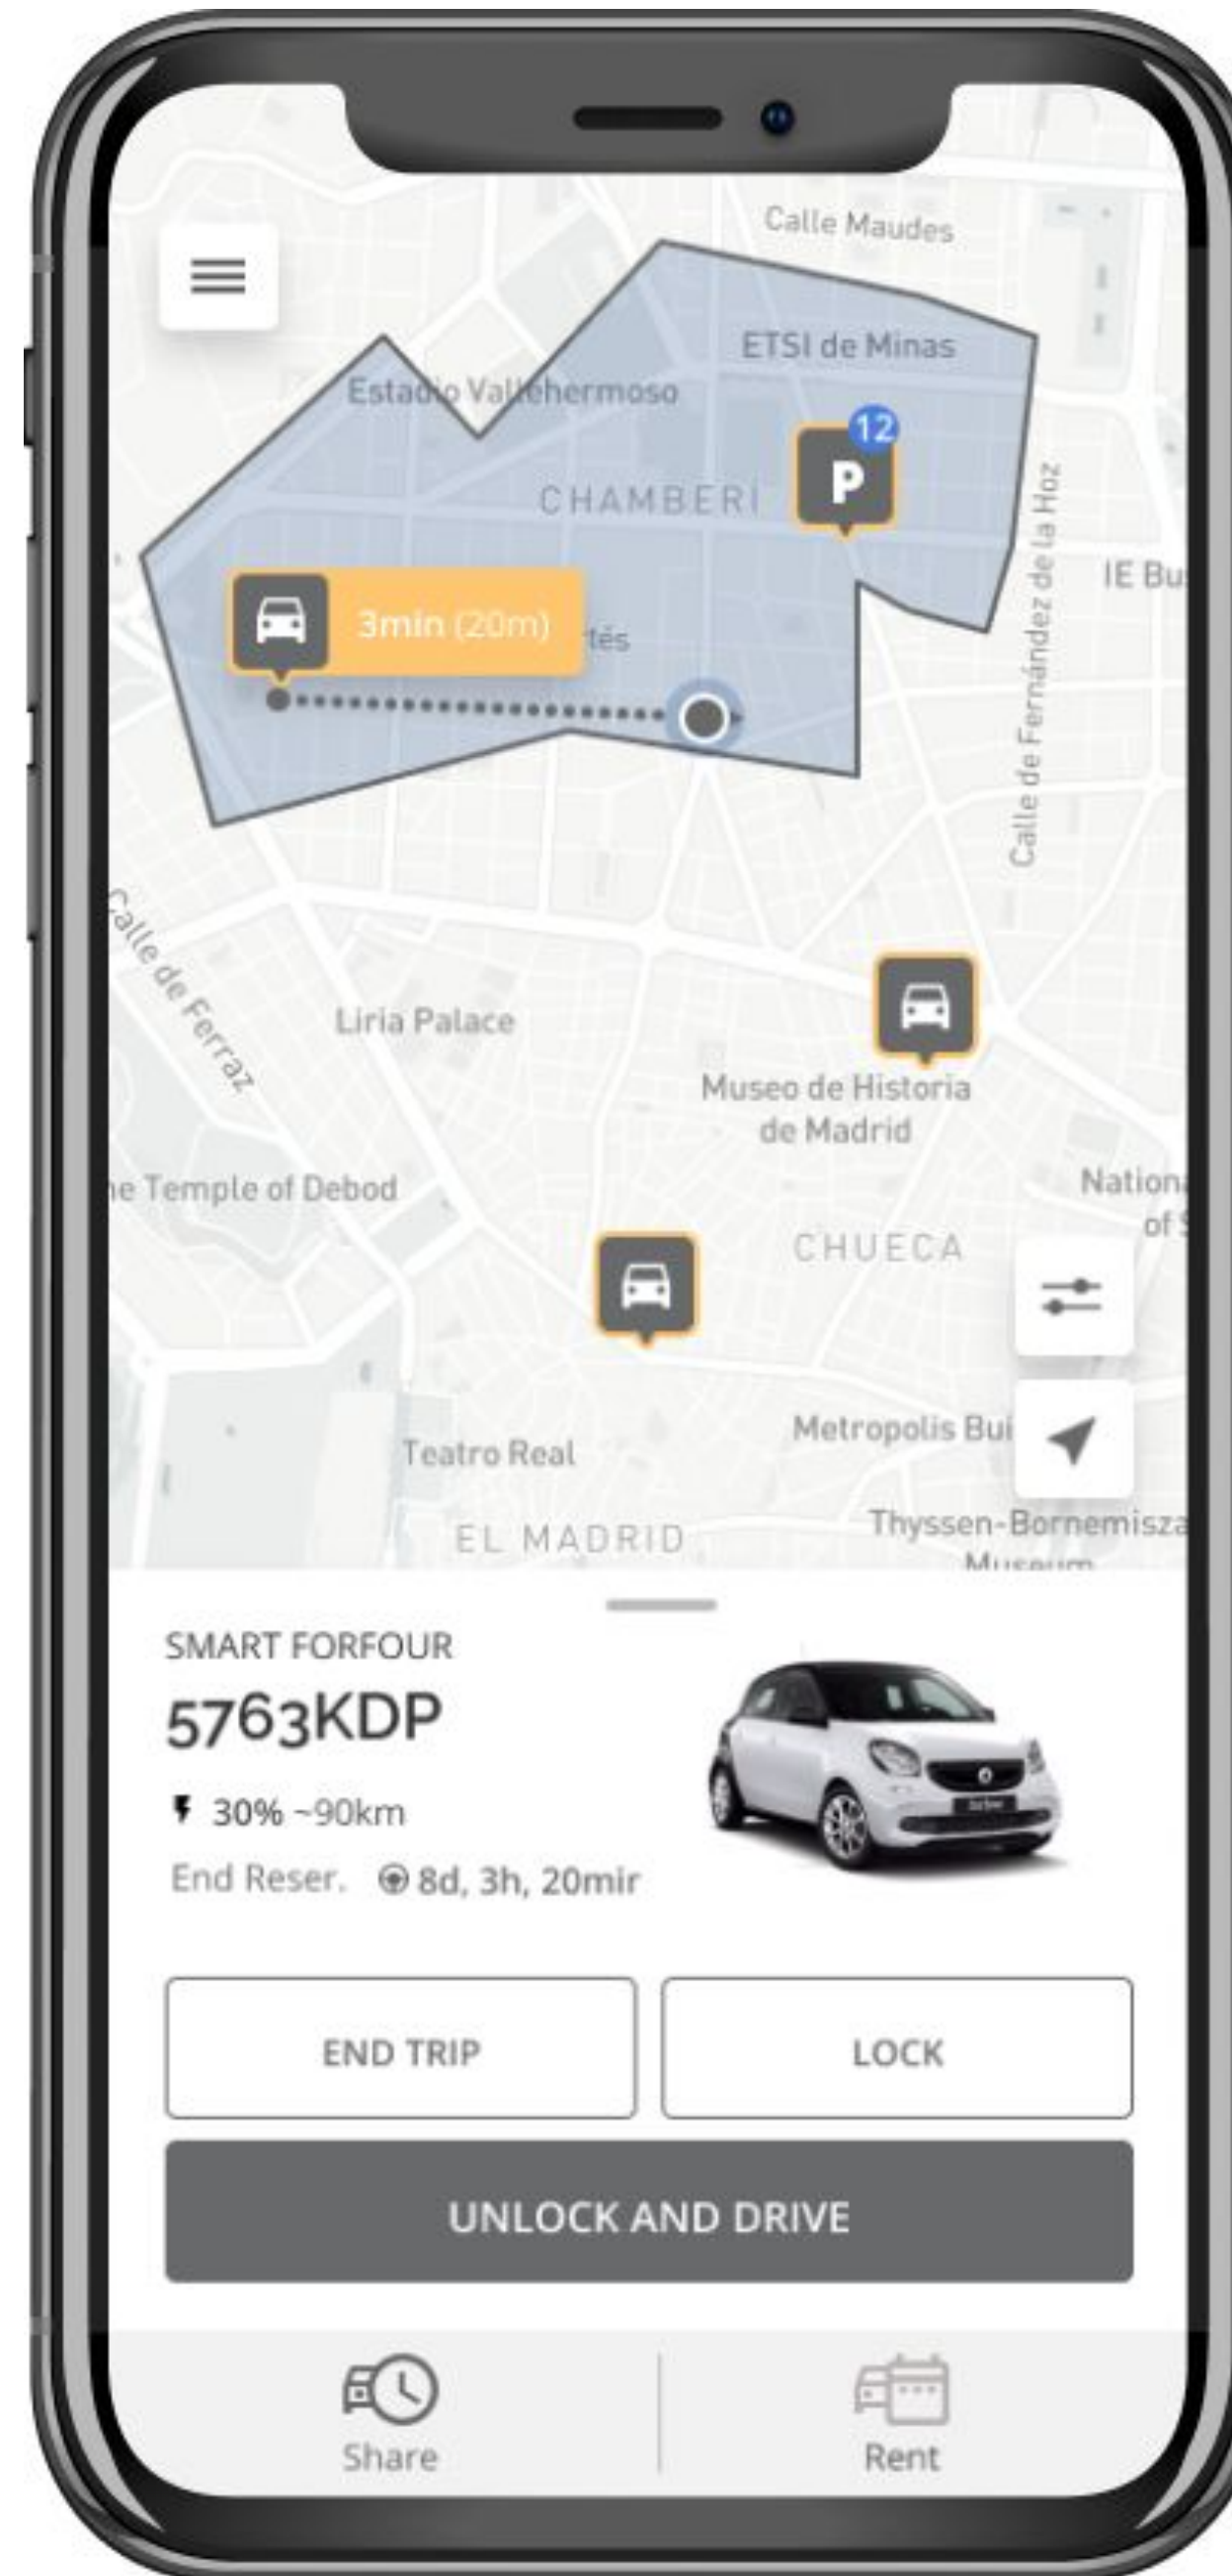

Cars, mopeds, bikes and e-scooters

Solutions

Geofences

You can define geofences where you can place parkings and vehicles. Your clients will be able to use your service inside your defined geofences but won't be able to use it outside them.

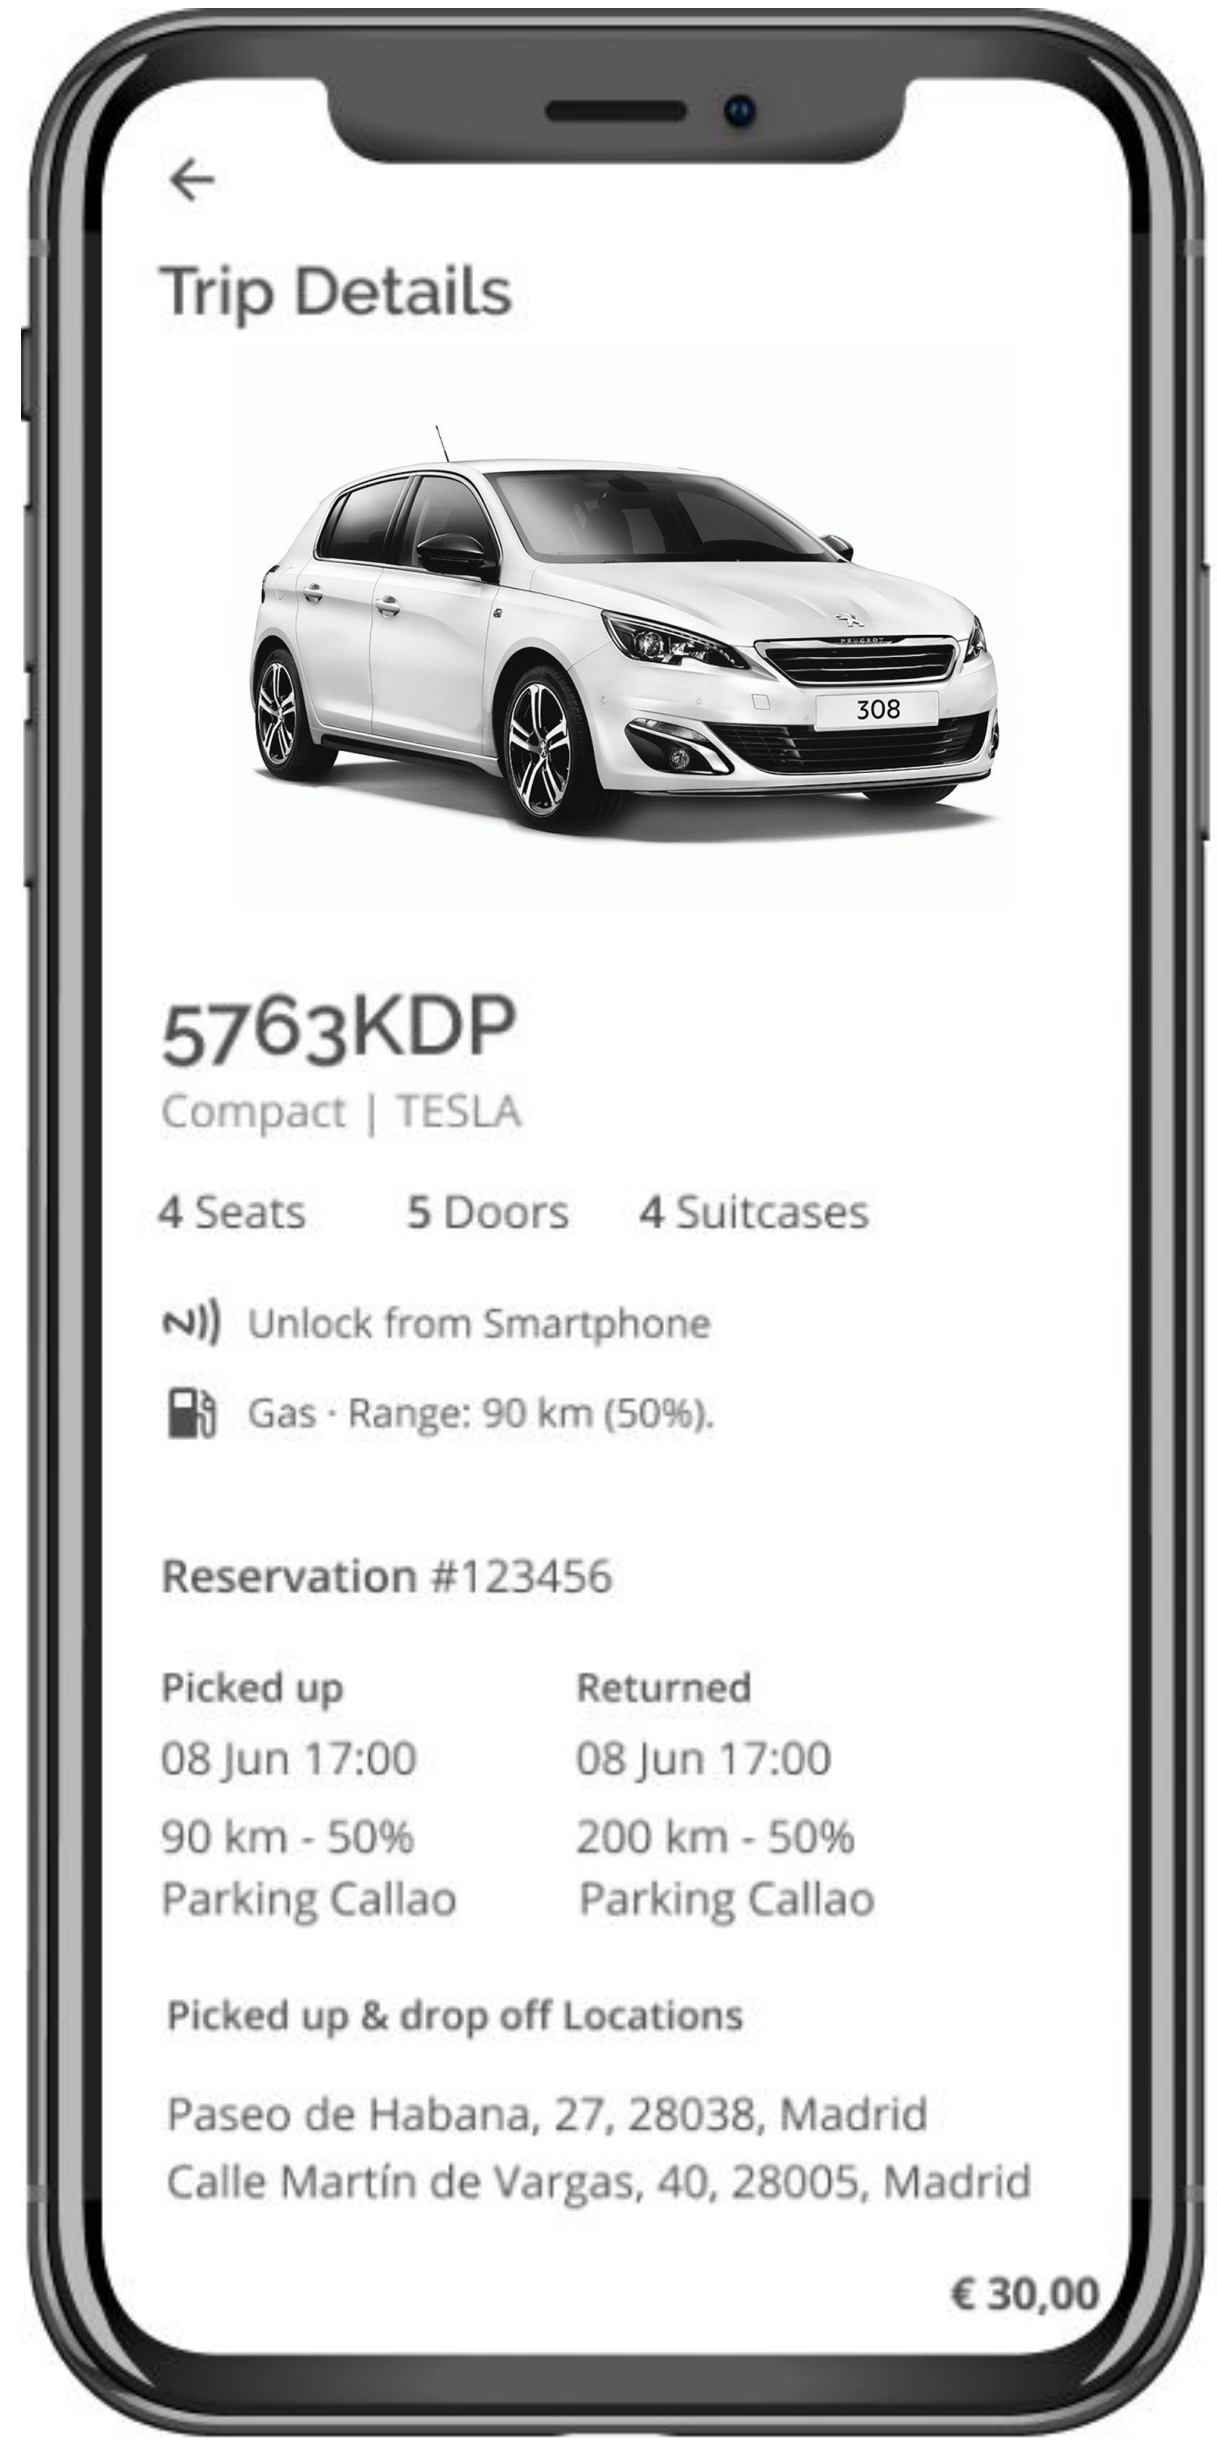

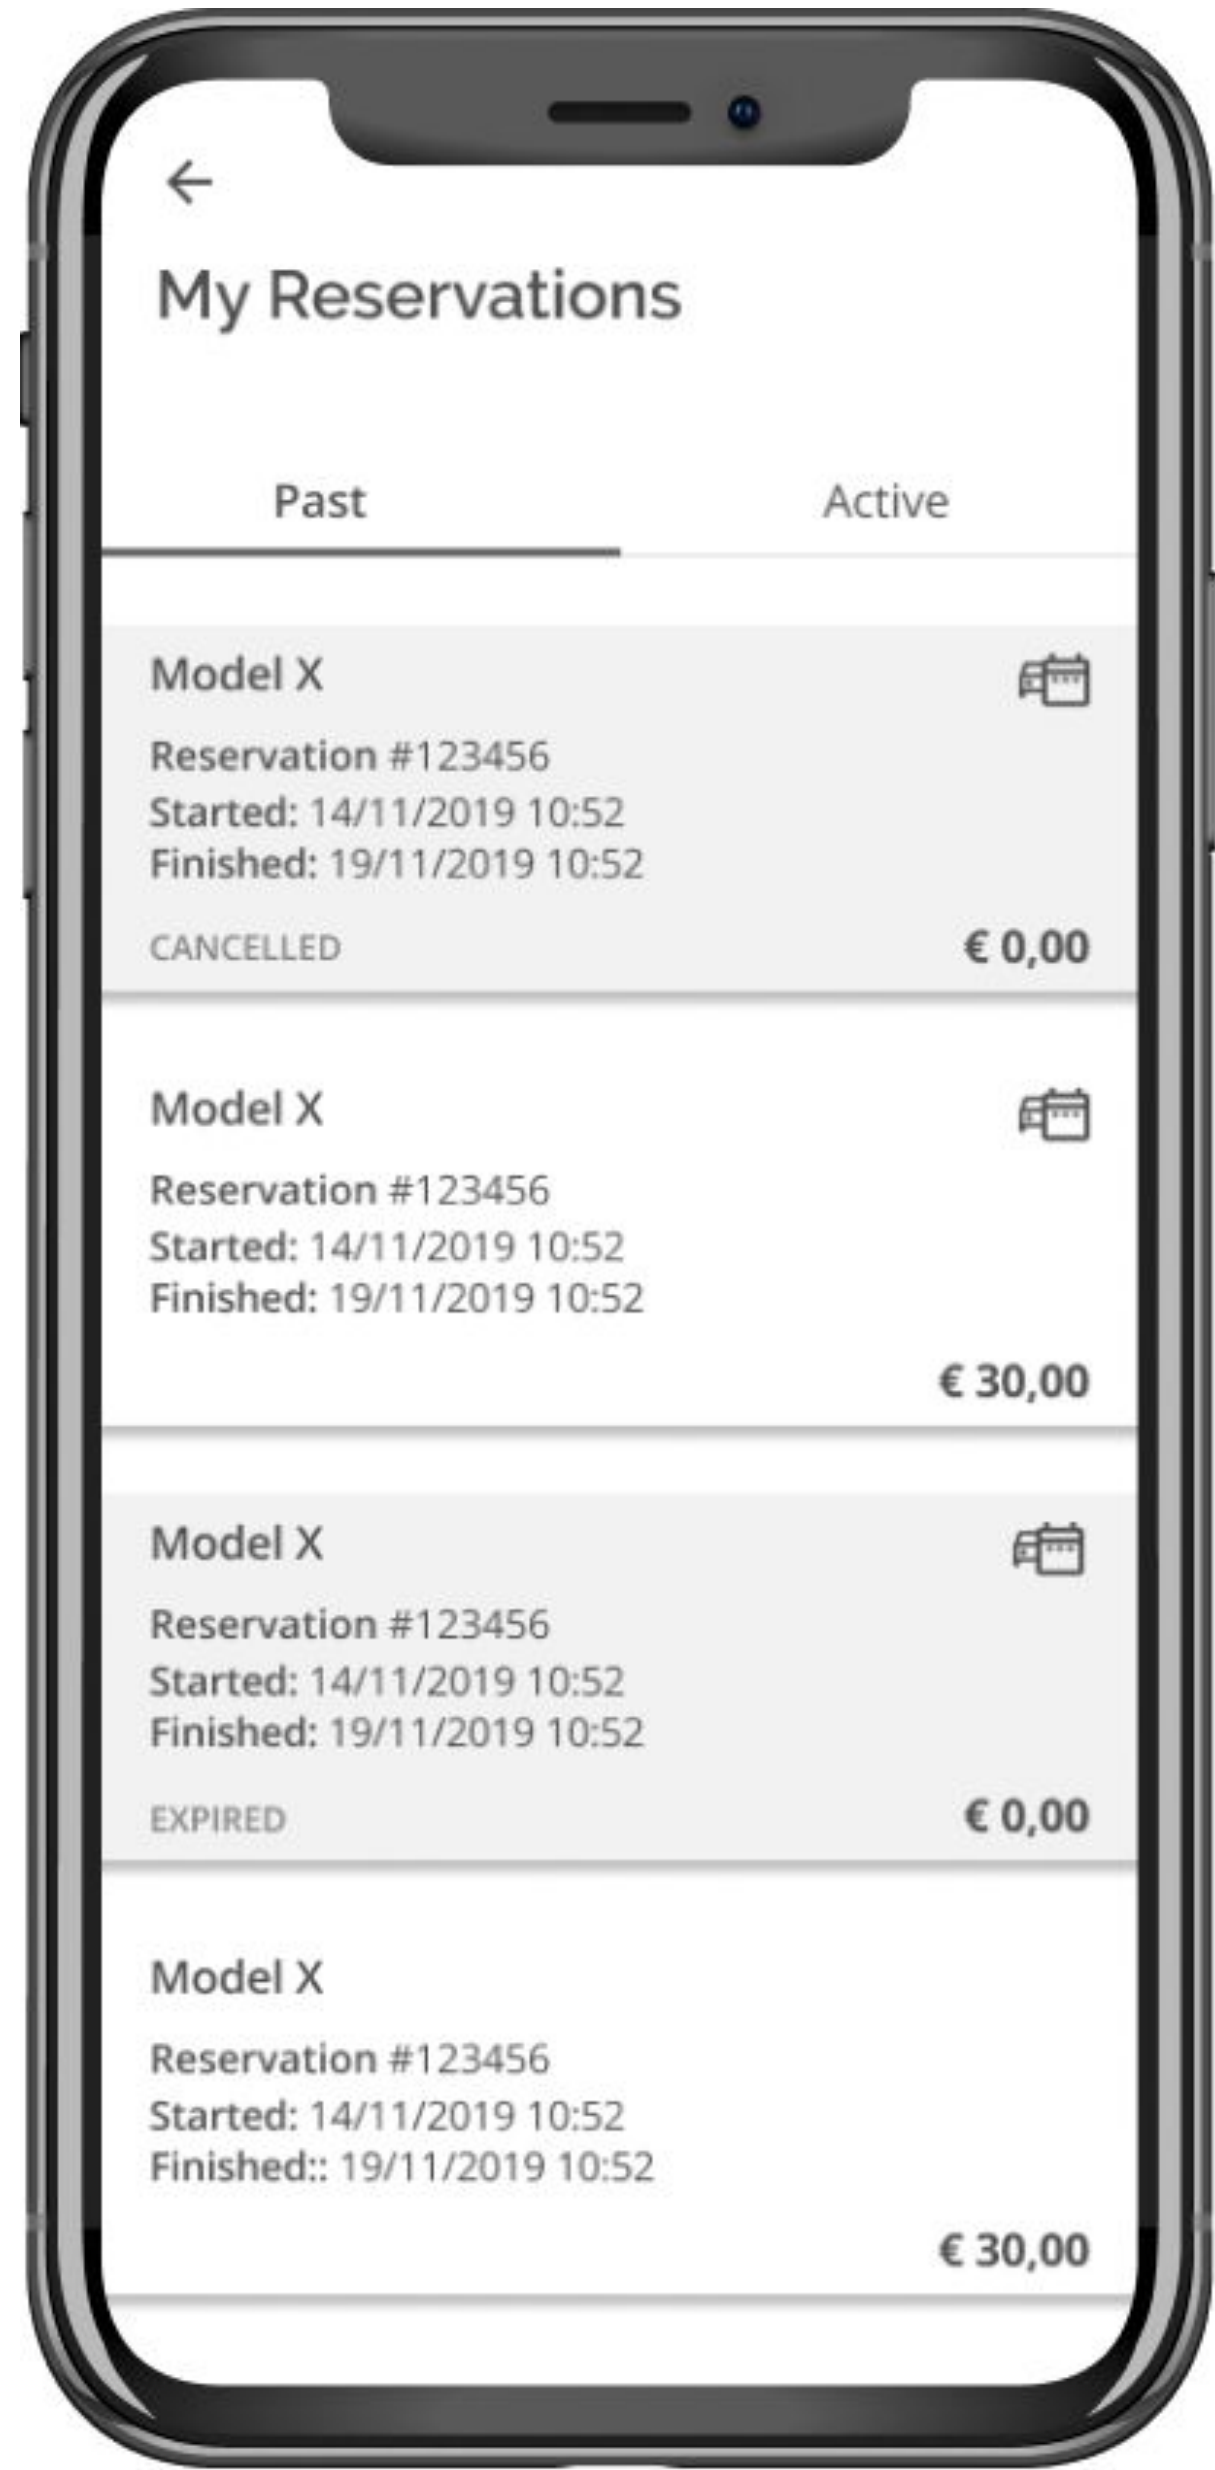

Solutions

Reservations History

Each user can check his reservation history and access to the summary of each of them: Start and end data, price, vehicle details and contracts, invoice linked to it etc.

-  Invoice
-  Contract Annex 1
-  Contract Annex 2

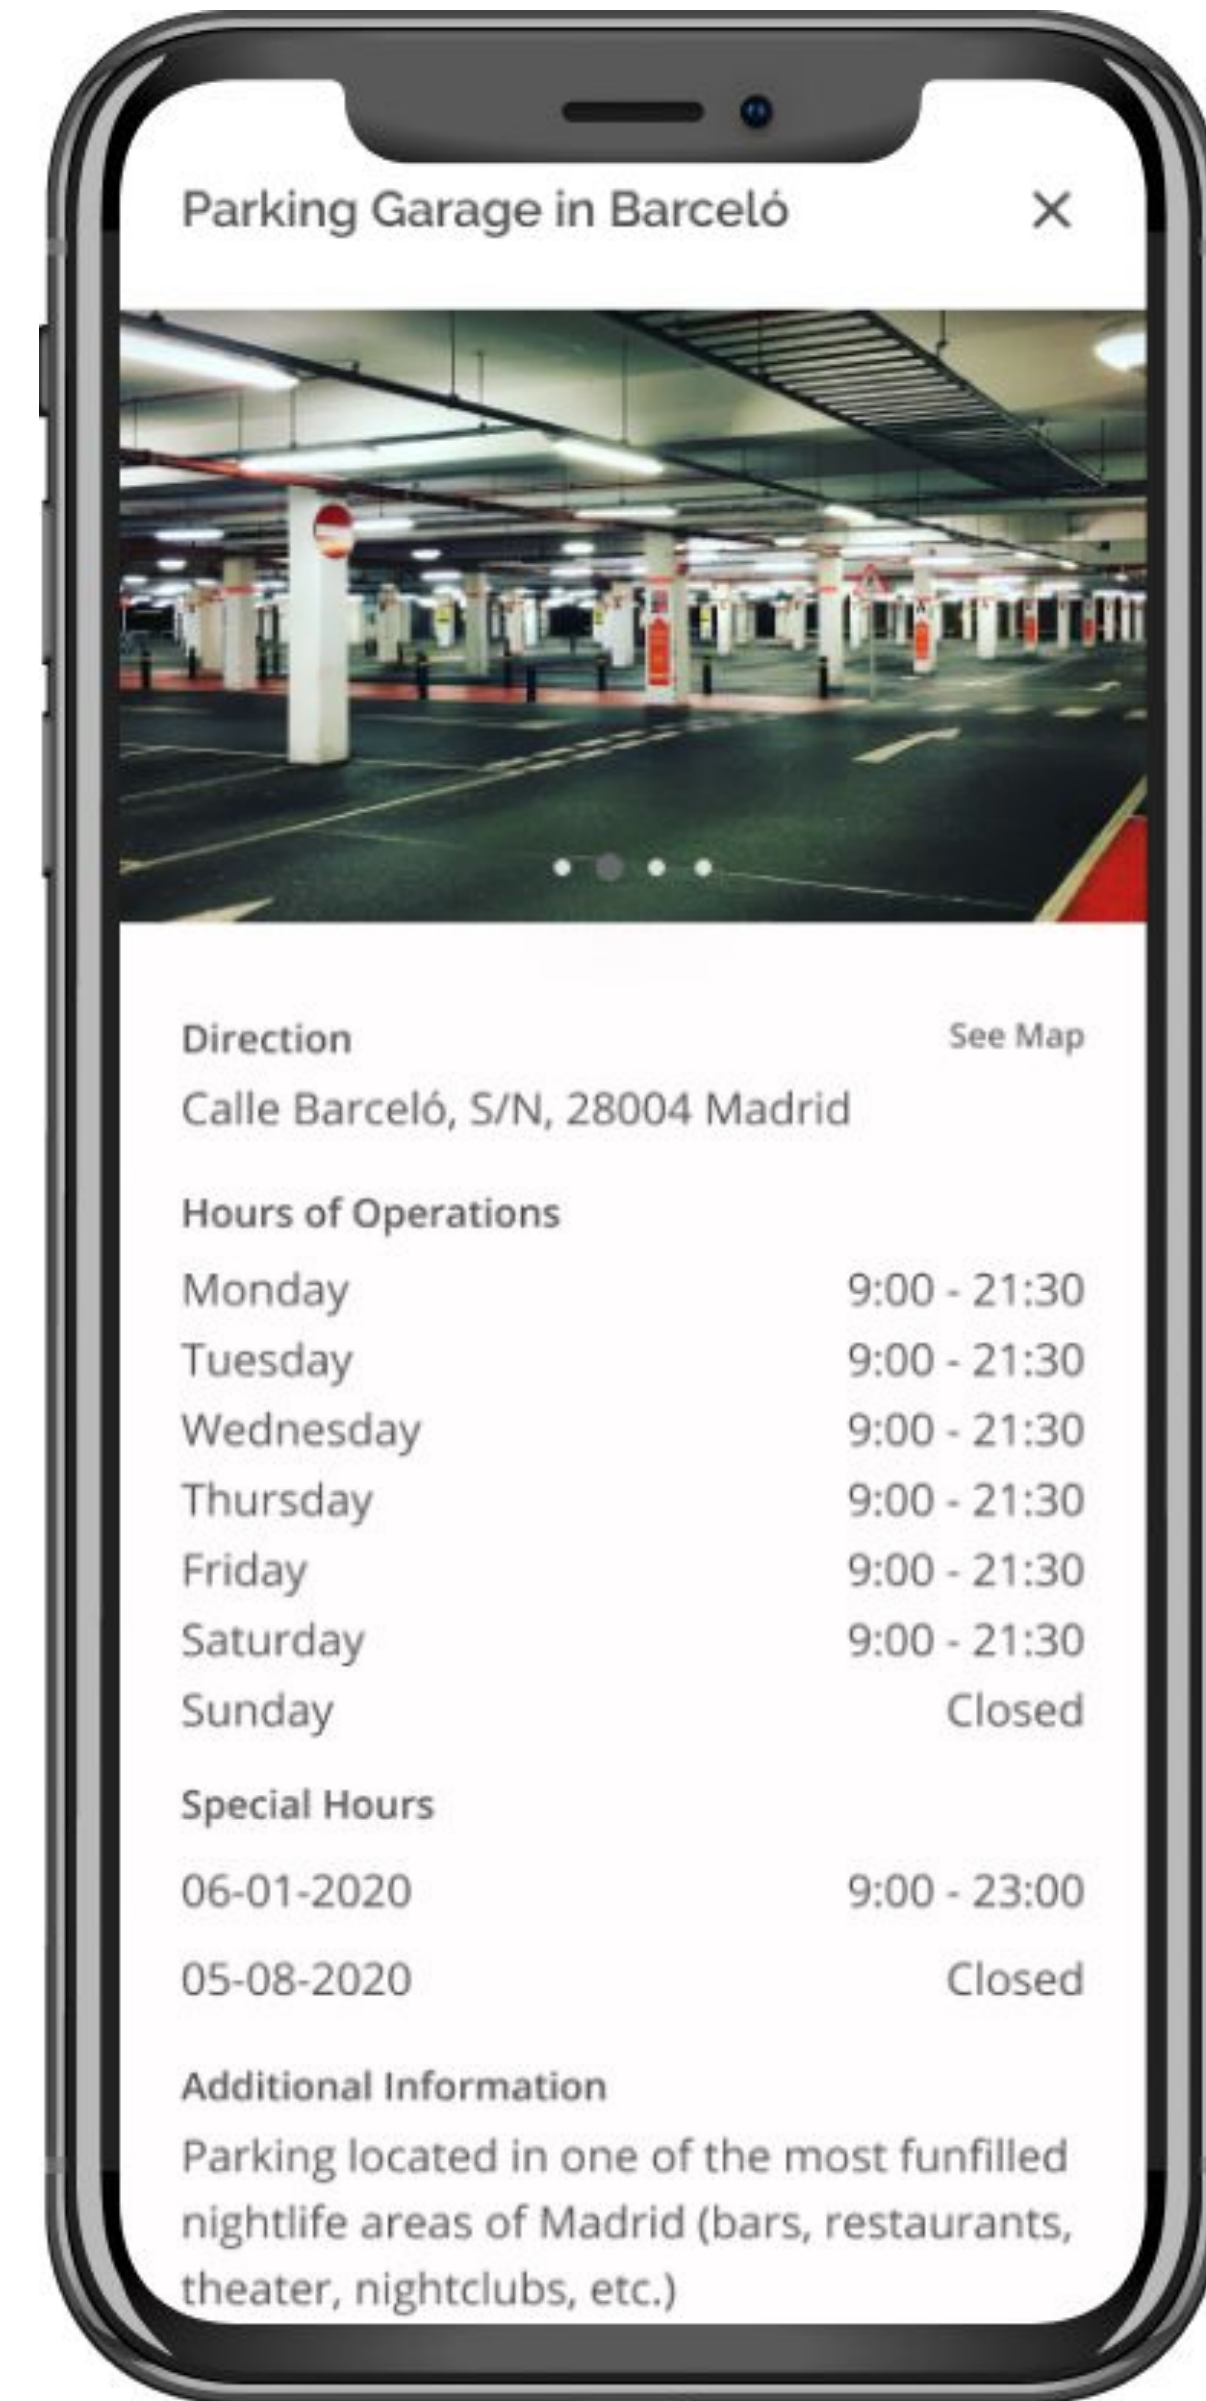

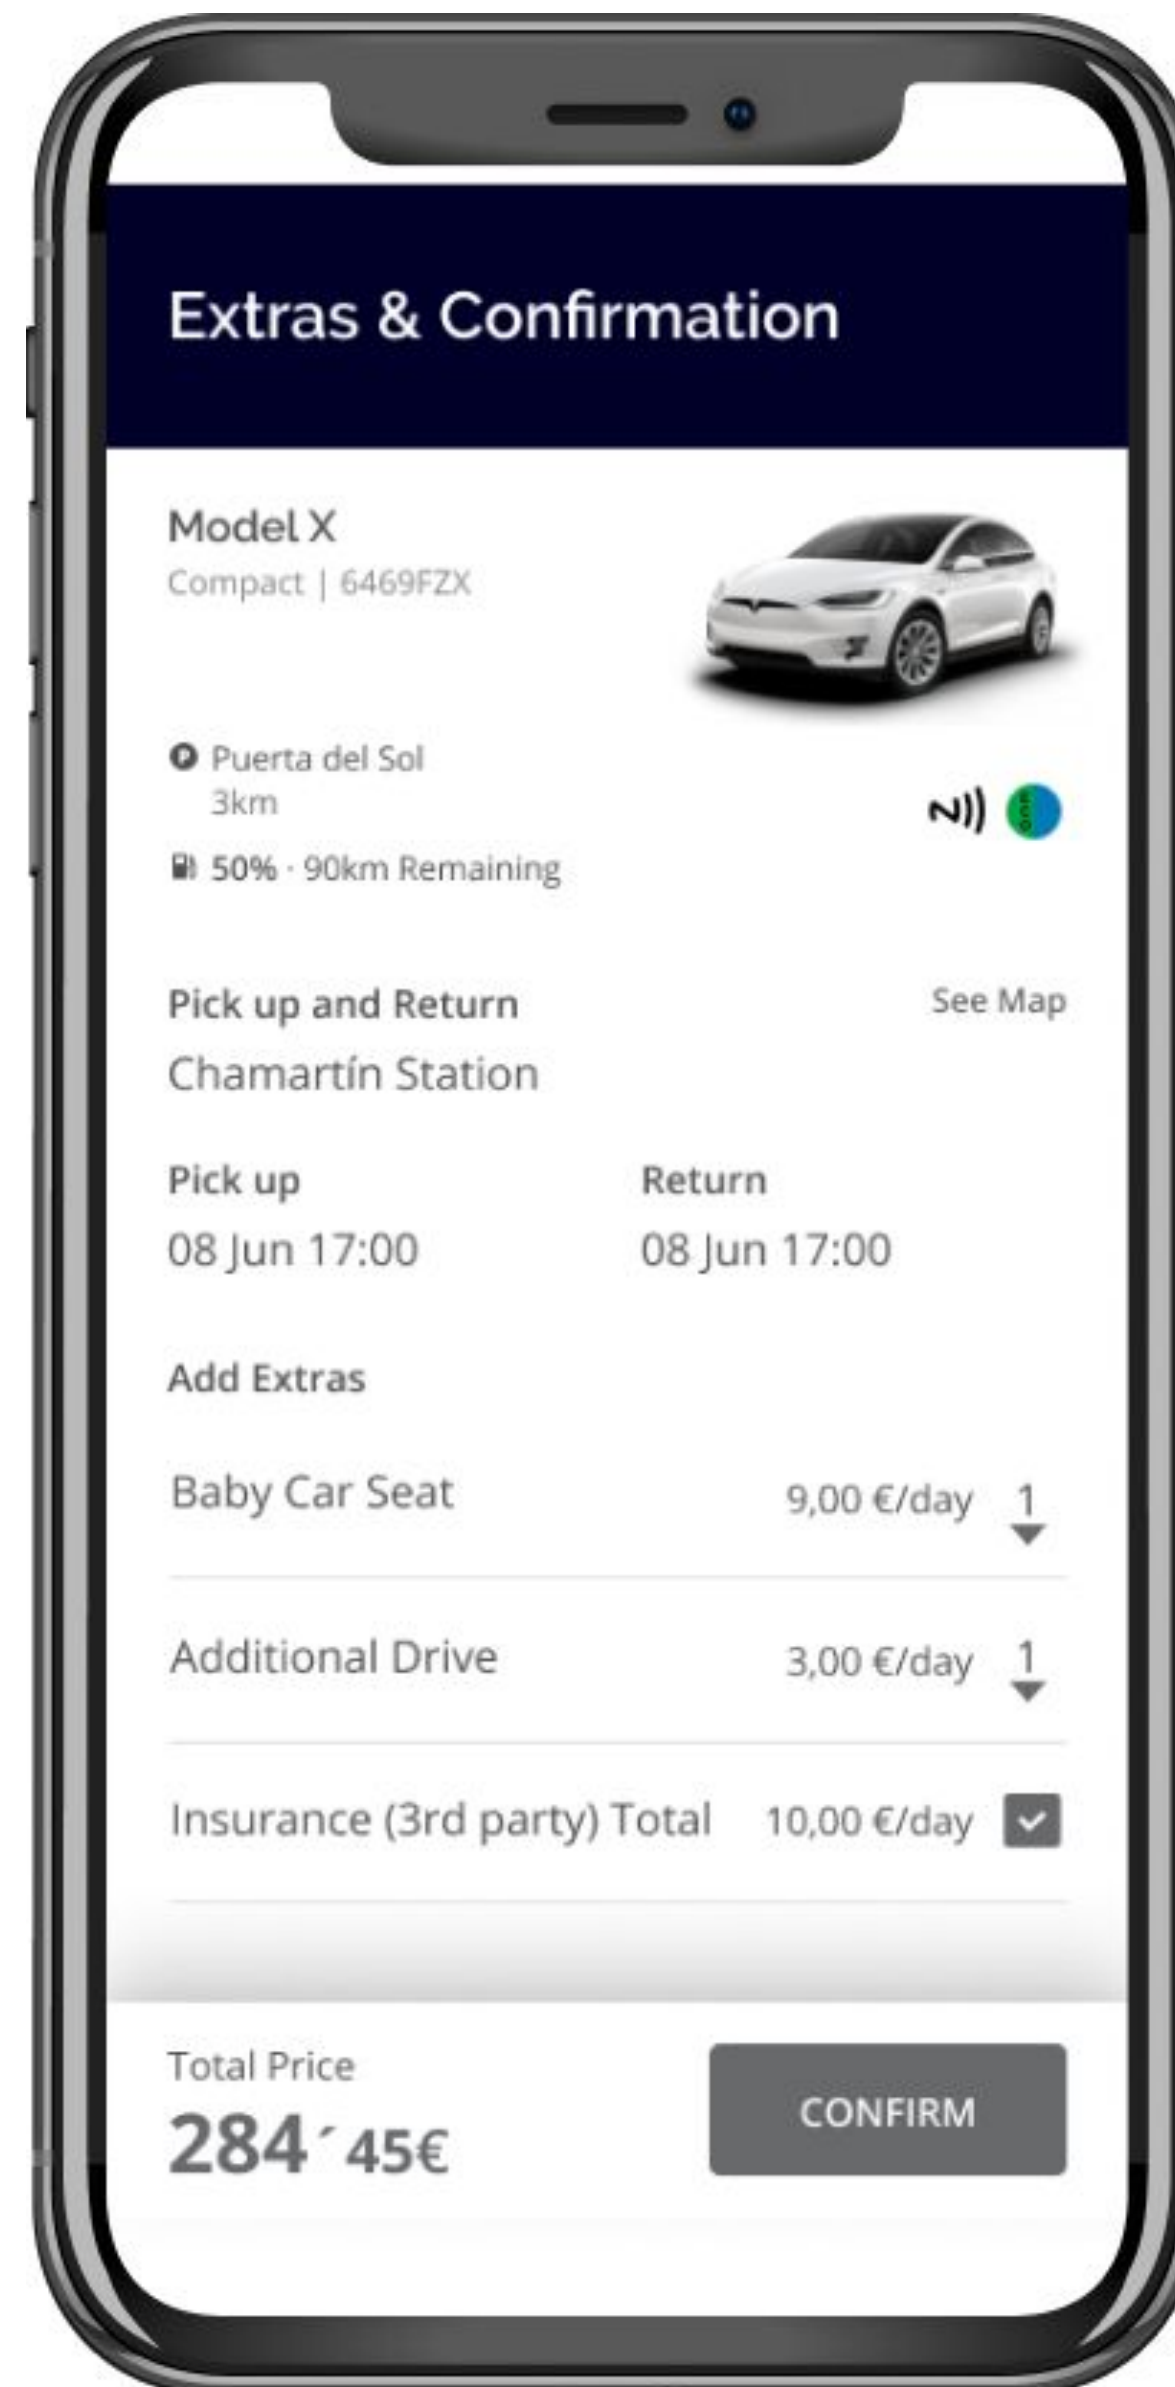

Solutions

Extras

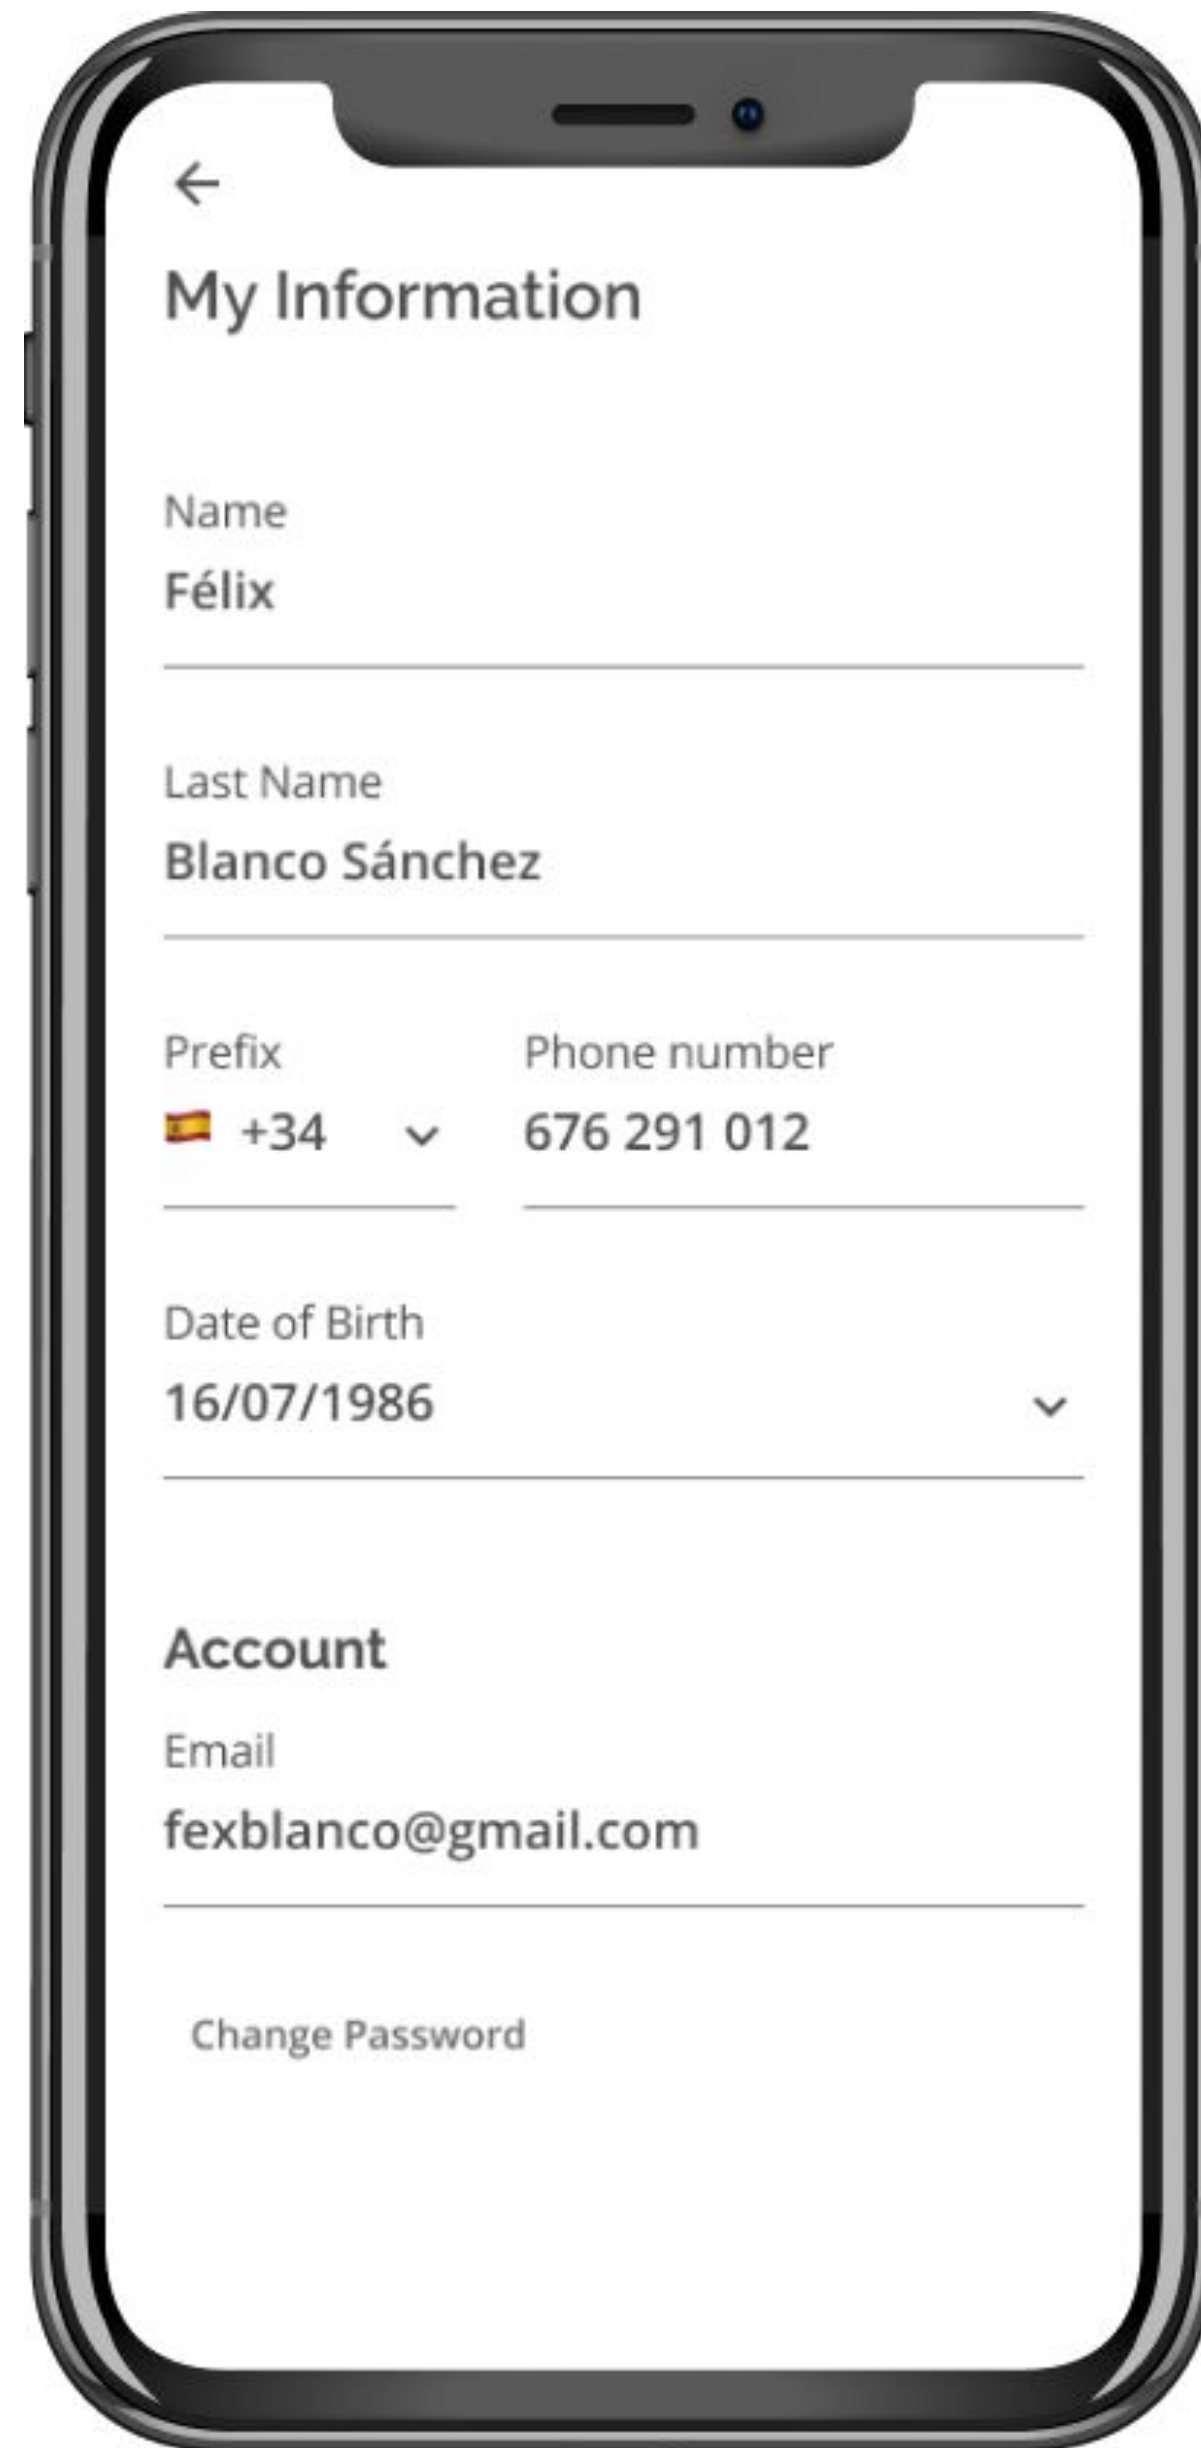

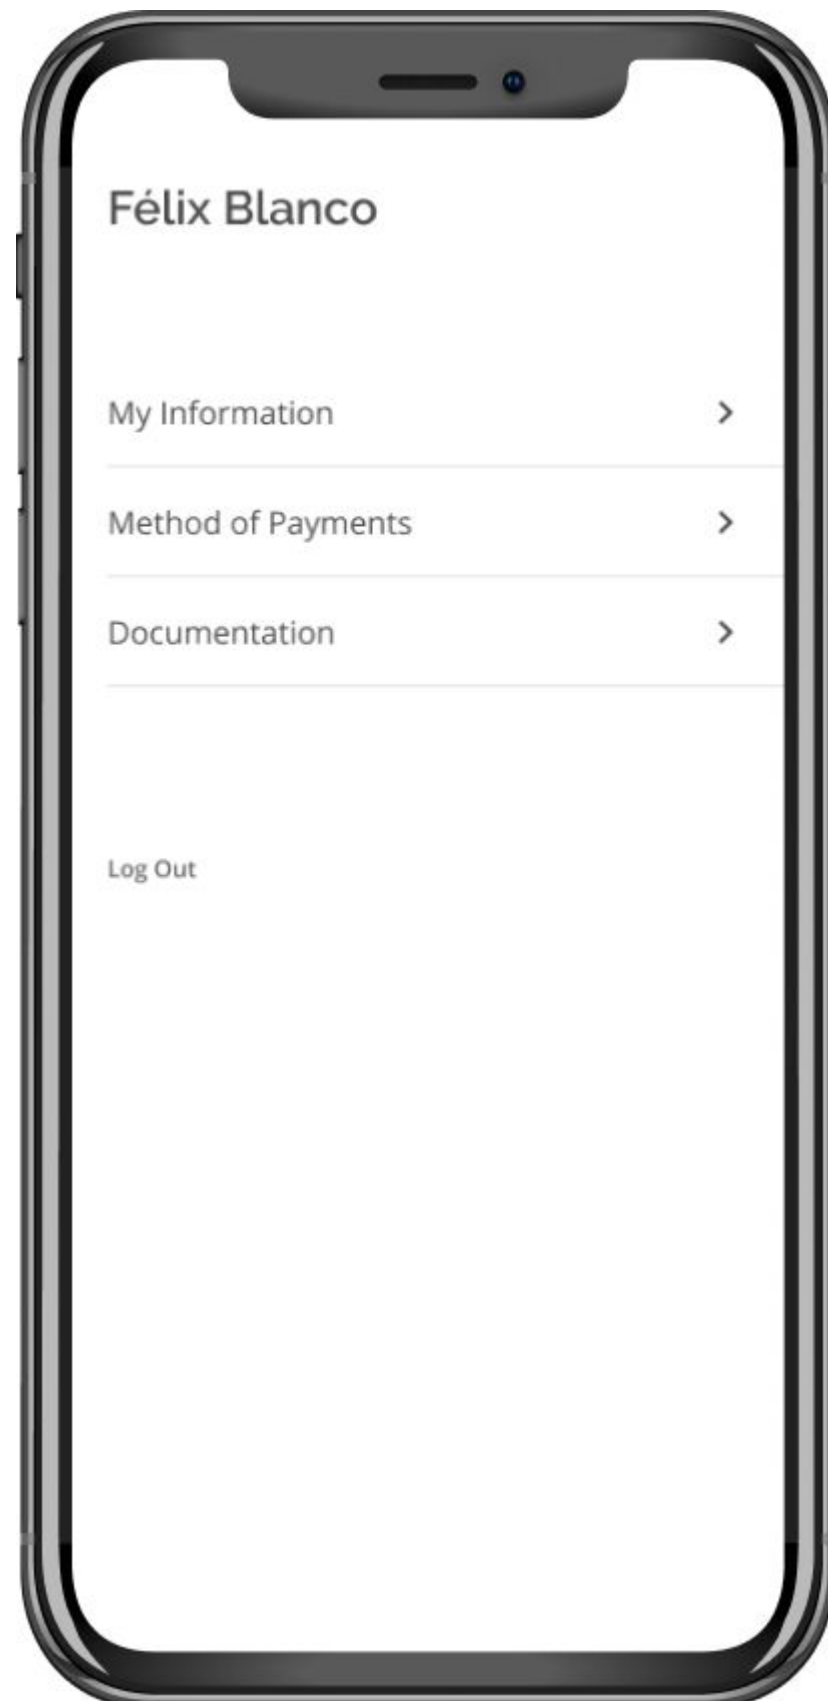

The client can opt for extras, including insurance, that they wish to have without any issues through the App when placing a reservation with the conditions that you offer.

Client can also have access to information of their interest, such as the info related to the car parking lots where the vehicles of each reservation are located to improve the customer experience.

Solutions

Profile

Each client will have a profile with their personal and contact information; his documentation and his payment method data.

The client can update/consult his profile and the administrator can validate those data enabling the user to make reservations.

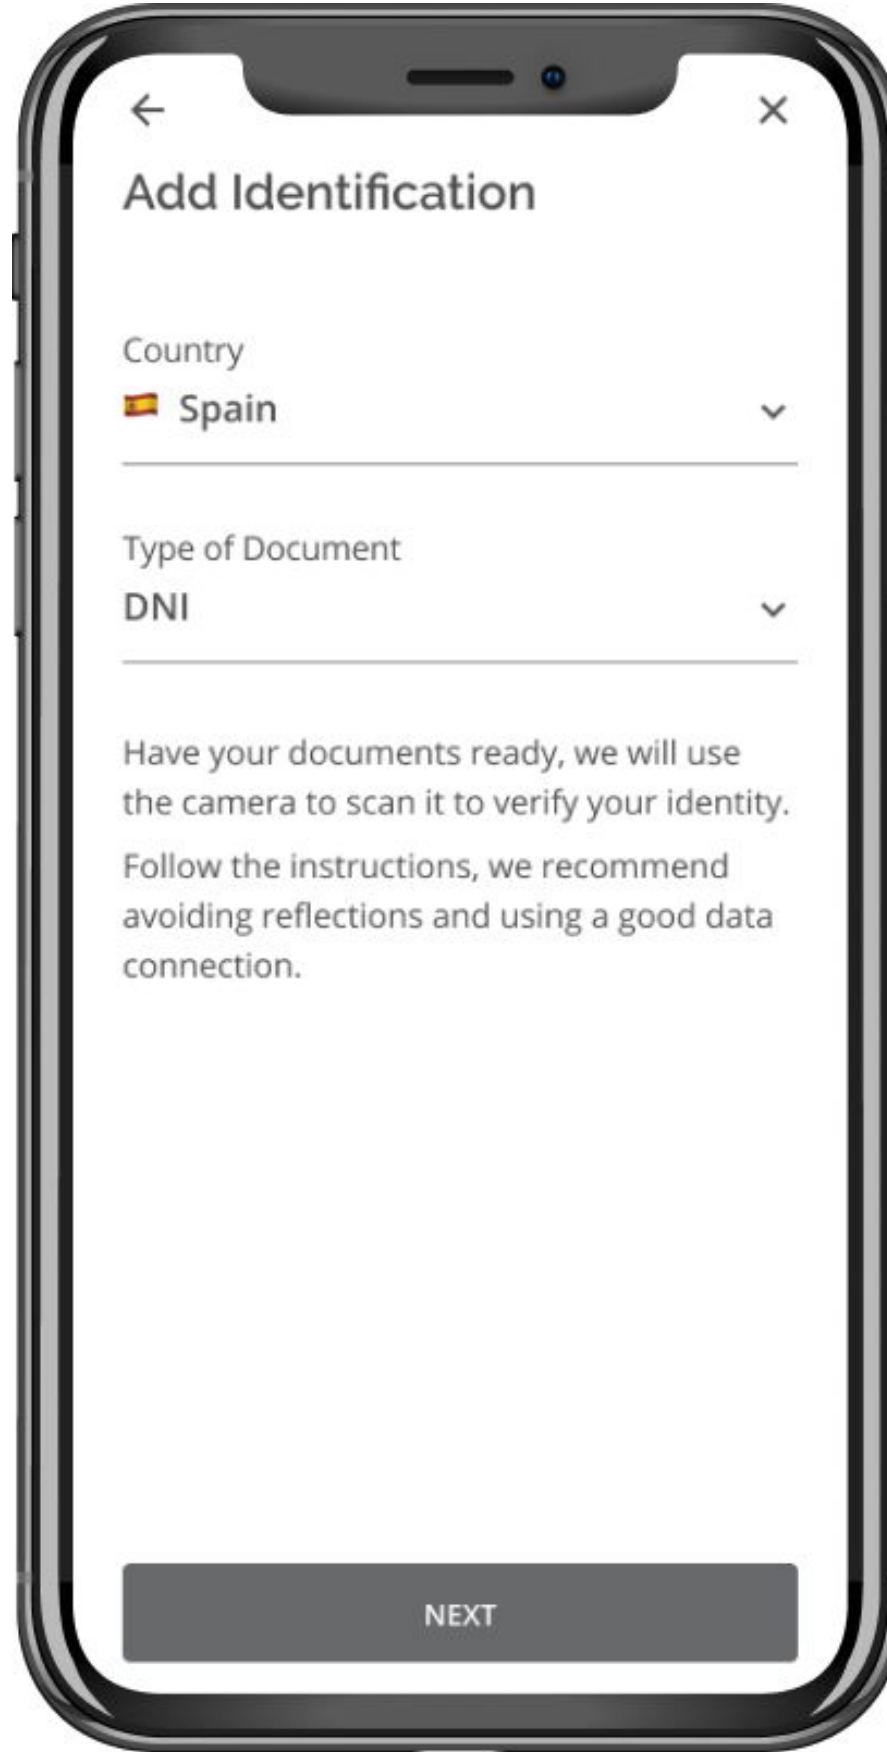

Solutions

OnBoarding

The validation of the new profiles can be done automatically by biometric validation through the Video ID of the App.

Through the App, customers can also complete the registration process by uploading their documentation: ID, driving license etc.

Solutions

Payments

Through the App, customers can make the reservation payment.

The App will request the payment method with which they wish to pay the amount as a requirement to make the reservation through this channel.

Zip Code City

An aerial photograph of a highway interchange, viewed from above. The image is overlaid with a semi-transparent blue filter. A single white car is visible on the main road, positioned near the center of the frame. The text '02. To the connected vehicle & Platform' is superimposed in a large, bold, black font across the middle of the image.

02. To the connected vehicle & Platform

02.

To the connected vehicle

Step 1

We carry out a **compatibility study** of your fleet to determine which case of use is yours.
Once the vehicles to be connected have been selected;
We accompany you throughout the installation process to perform it in the best possible way.

We connect your vehicles
to the cloud

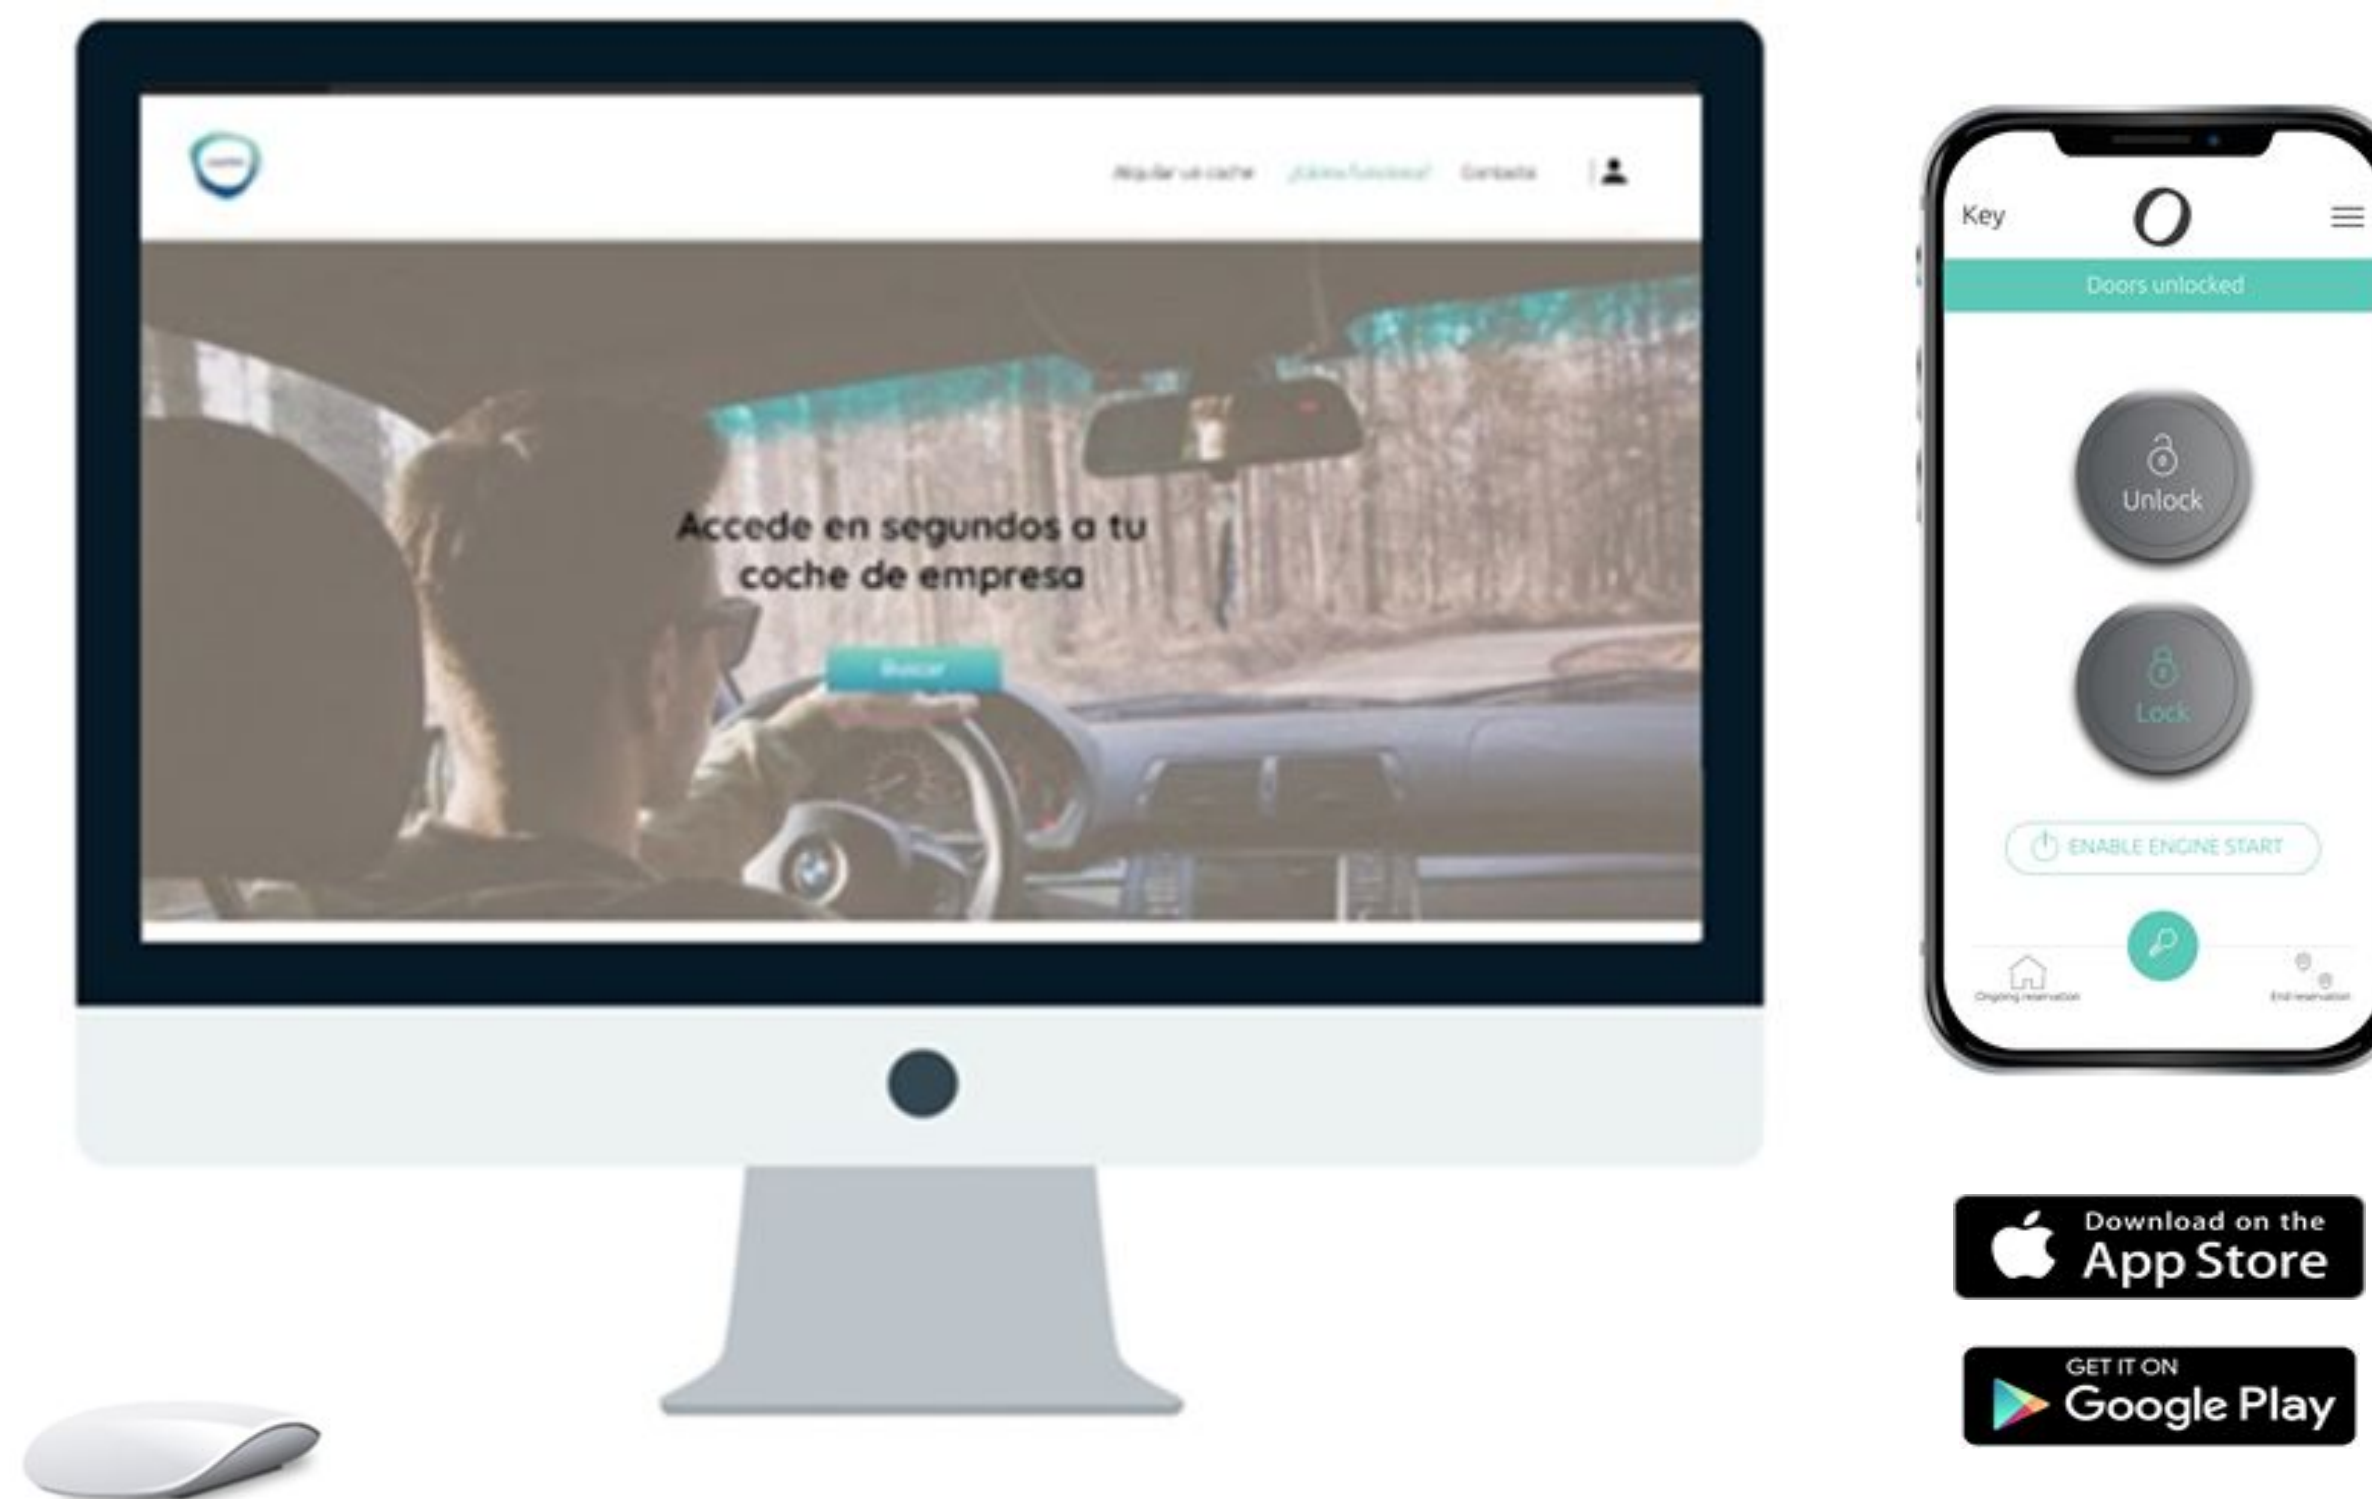

Management

To the connected vehicle

Step 2

We prepare a **BackOffice** with a custom **administrator panel** through which you can manage all reservations, users, location, use and even remote opening and closing of your connected vehicles.

You will also have access to the **modules of damages, payments, billing, alerts etc.** that will give you a **360 view** of what is happening in your digital rentals allowing optimal management of your fleet.

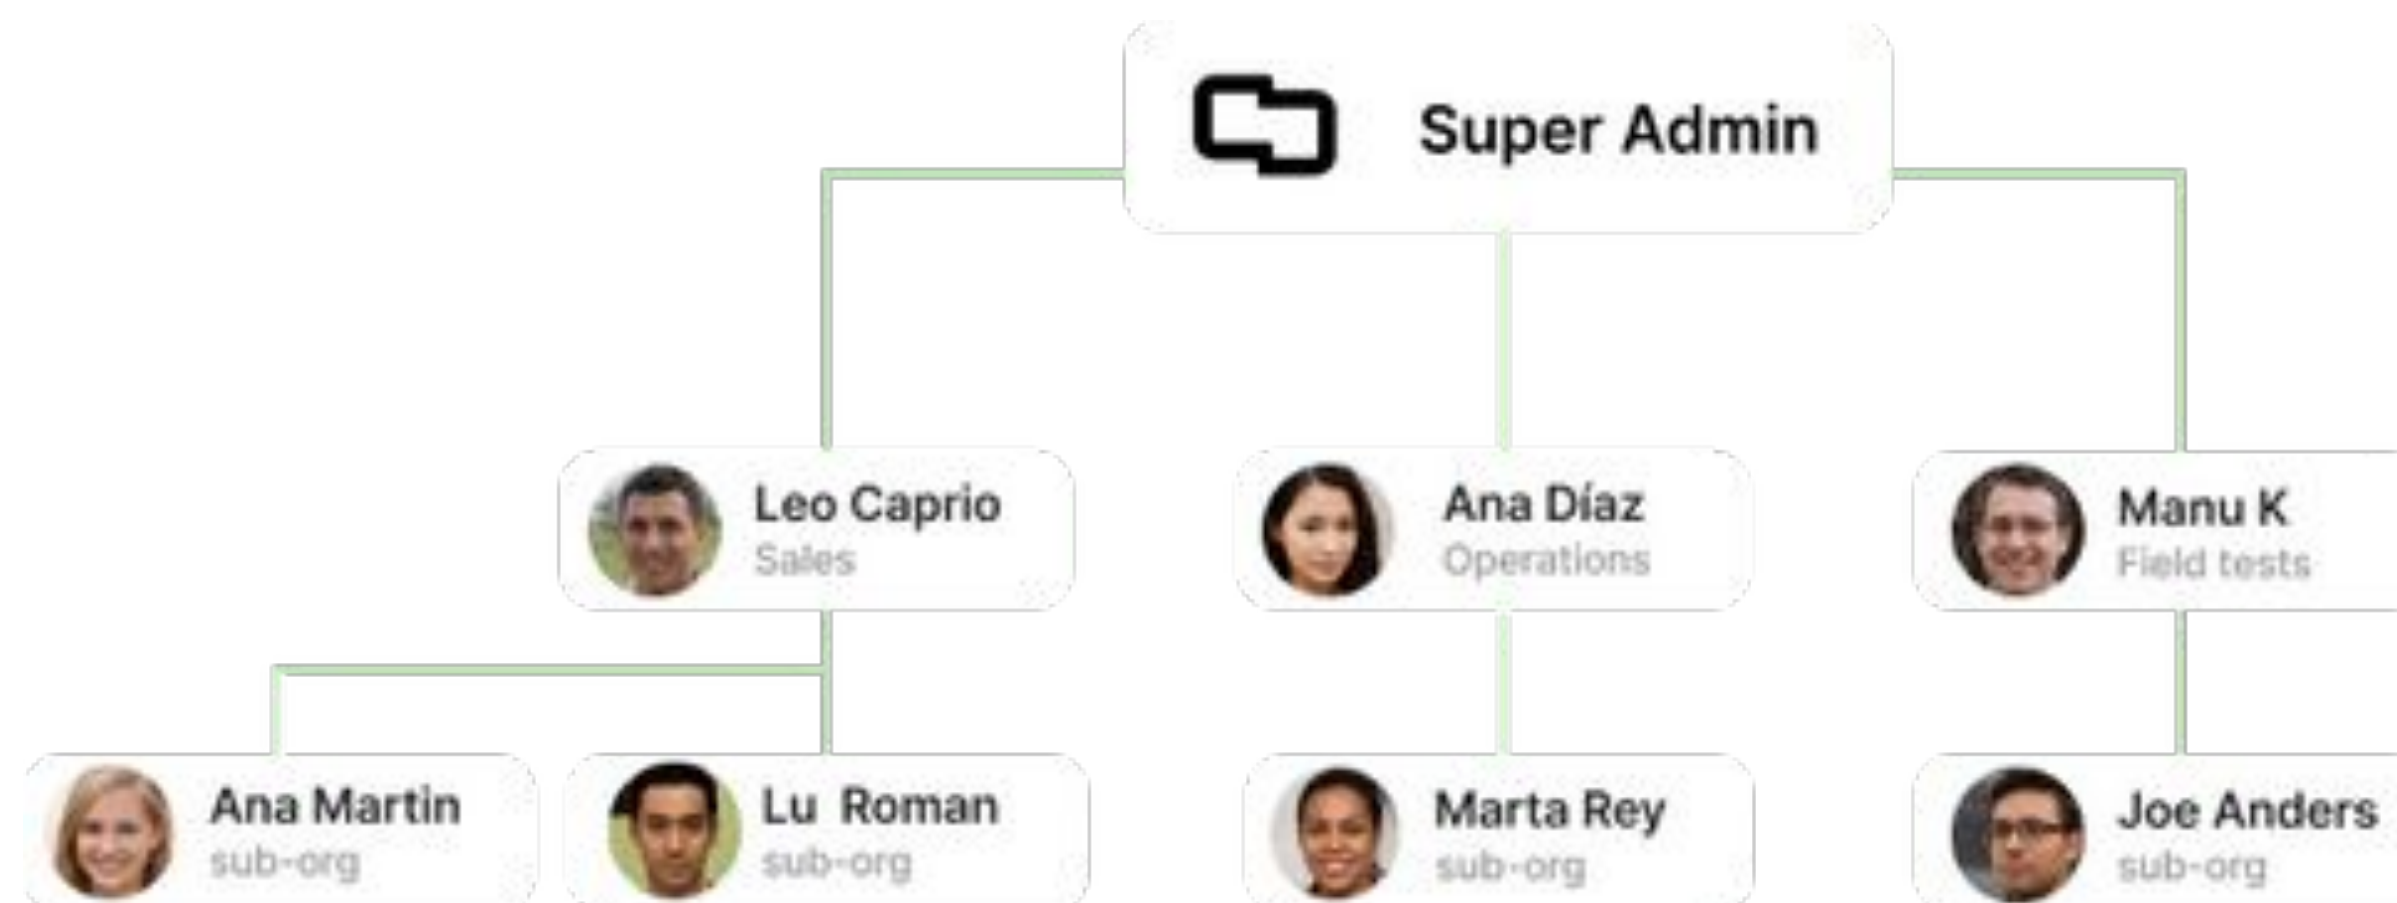

Platform

Organizations' Tree

The company's fleet manager may subdivide the fleet between departments.

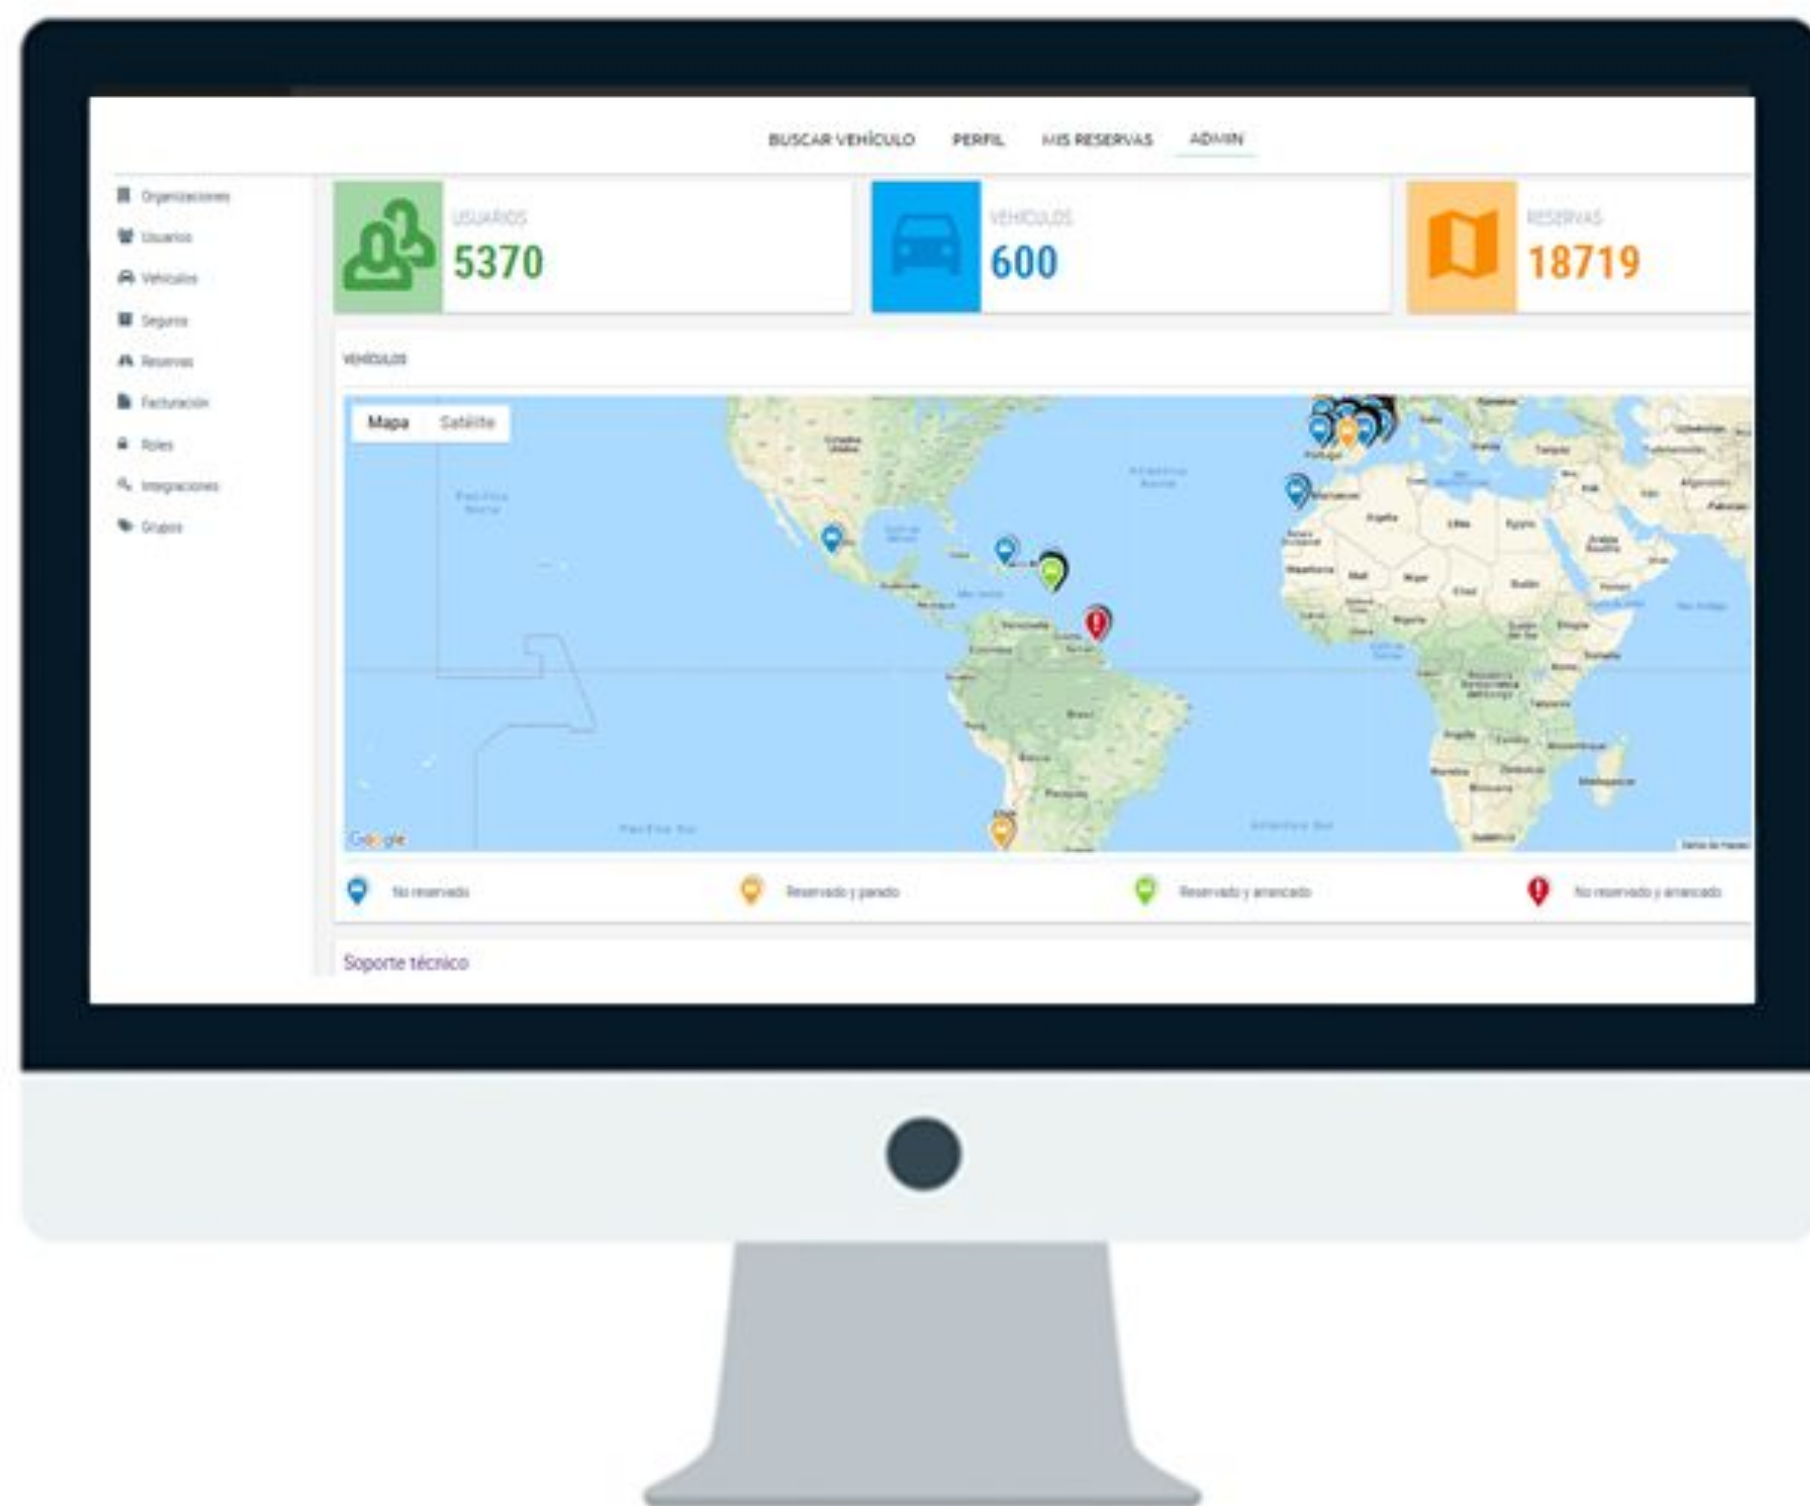

Sub-organizations dependent on the parent organization but with particular characteristics may be created.

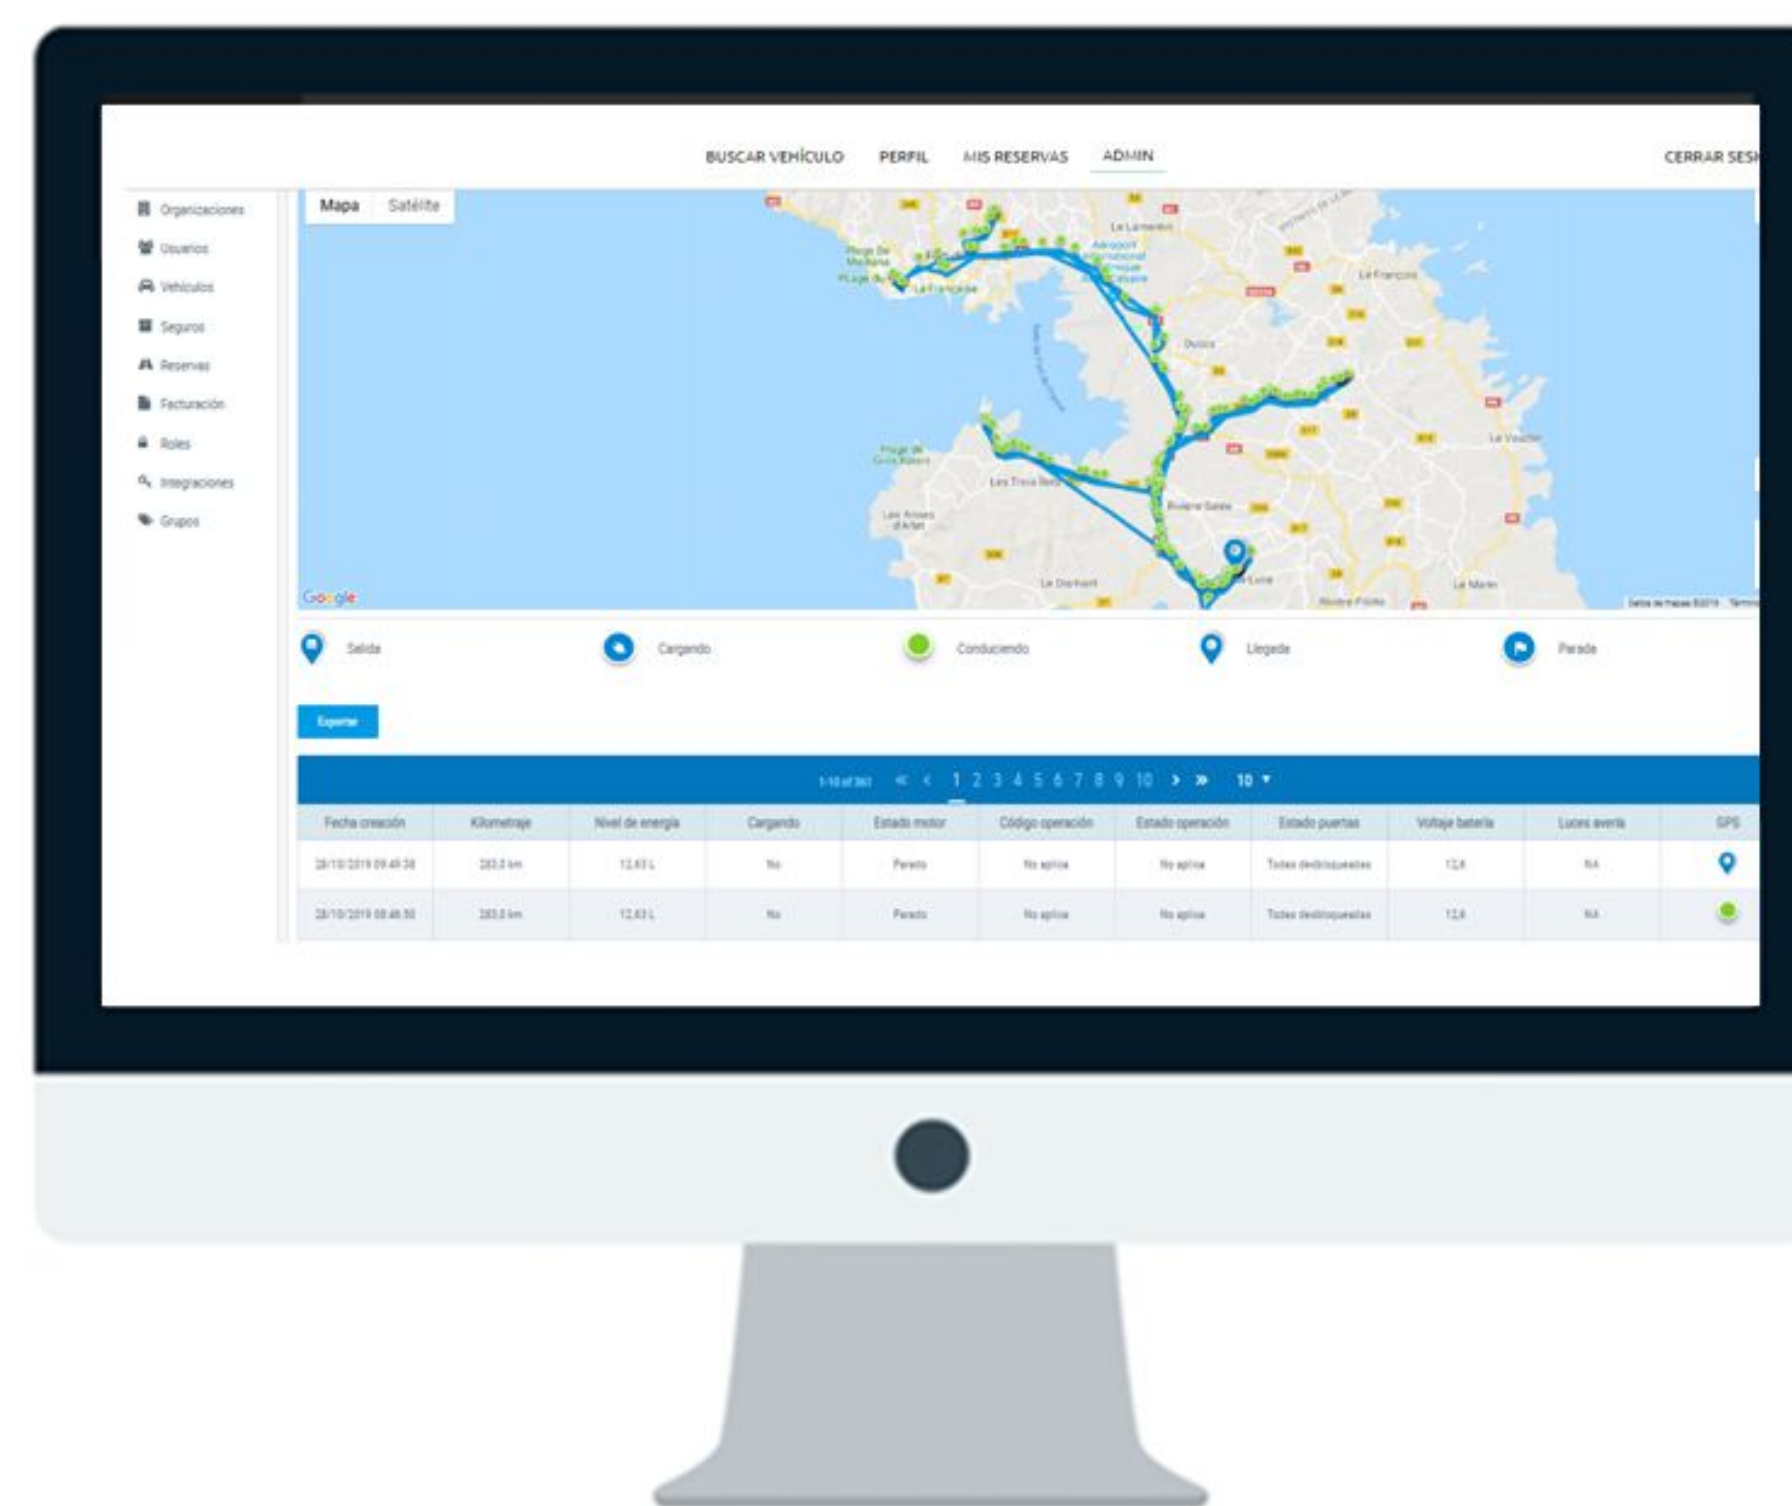

Platform

To the connected vehicle

Reservations, users, vehicles, etc.

Routes associated to the locations

Analytics

Make sure that you have all the data needed for making the best decisions and achieve operational proficiency leading towards high yield and profitability.

Heatmaps

Understand where your users are when looking at the app, when they start/finish a trip or where they stop during the journey, so you can optimize the position of the fleet for operation proficiency and maximization of profitability.

Analytics

Make sure that you have all the data needed for making the best decisions and achieve operational proficiency leading towards high yield and profitability.

Financial KPIs

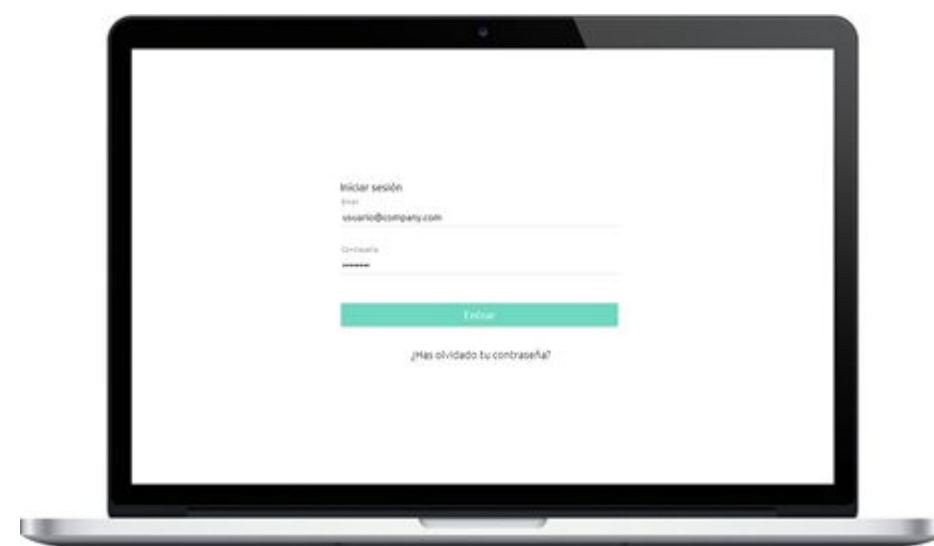

Make sure you understand how much money is your fleet making on the fly. KPIs per day, week, per vehicle or group of vehicles to track the income depending on the different locations, or business models.

Additional functionalities

To the connected vehicle

Invitations & groups

Invite users so individual and safe

Rules & alerts

Set up the events you would like to monitor and establish the way you want to receive the alerts
