**EF POLYMER
PRIVATE LIMITED**

Grow your plant/crop
with less water and fertilizer

Our Product

Biodegradable

We used biodegradable waste to create this solution and to make it completely biodegradable in the soil after 6 months of application.

Organic

The uses of biodegradable waste and natural process make it organic in nature. We didn't use any kind of chemical at any stage to make this 100% organic.

Pollution-Free

Keeping in mind the current situation of chemically prepared agriculture fertilizer and pesticides, we make our product completely pollution-free so it won't harm soil, crop/plant, environment, and human being as well.

About Us

Providing sustainable agriculture inputs to reduce water and fertilizer requirement and maximizing profit for farmers.

**Enhancing Agriculture
Yield and Quality in Low
Water Environment**
