An aerial photograph of a winding asphalt road through a vast green field. Three cars are driving on the road. The road has smart markings: green dots on the left side and red dots on the right side. The sky is a clear, light blue.

# ELONROAD<sup>©</sup>

Electrifying freedom

# Problem

The transportation of people and goods needs to become sustainable. Yesterday.

Yet immature charging infrastructure is slowing us down.

30%

The transport sector's part of Sweden's total share of CO<sup>2</sup> emissions

500

charging poles needed per gas station

50%

of the EV cost is batteries

# ELONROAD

The green and lean charging infrastructure our world needs to move forward. For all EV's. When on the move. When standing still. Freedom. Electrified.

Electric road system

Automatic park charger

# The new global standard for green transportation of people and goods.

## For all electric vehicles

One charging solution for all EV's means convenience and lower costs.

## Driving and parking

An electric road and automatic park charger in one. High power conductive 300kW charging with 97% efficiency.

## No need to re-build

Upgrade existing road sections and parking spots enabling lean EV charging and energy efficient transportation.

## Smart charging system

Patented technology based on leading research. Wireless communication, intelligent sensors, cloud-based data traffic and beyond.

## Sustainable future

Reducing road transport CO2 emissions by up to 50% within a 10 year period

# The Market

**+500K km**

Motorways in  
developed  
countries

**27.14B**

Est. market value  
by 2025

**40%**

Of all vehicles will be  
electric by 2040

# The Deal

Buckle up and join us in the fast lane

## Deal

- 2M EUR
- Equal equity
- 18 Months of runway

## Use

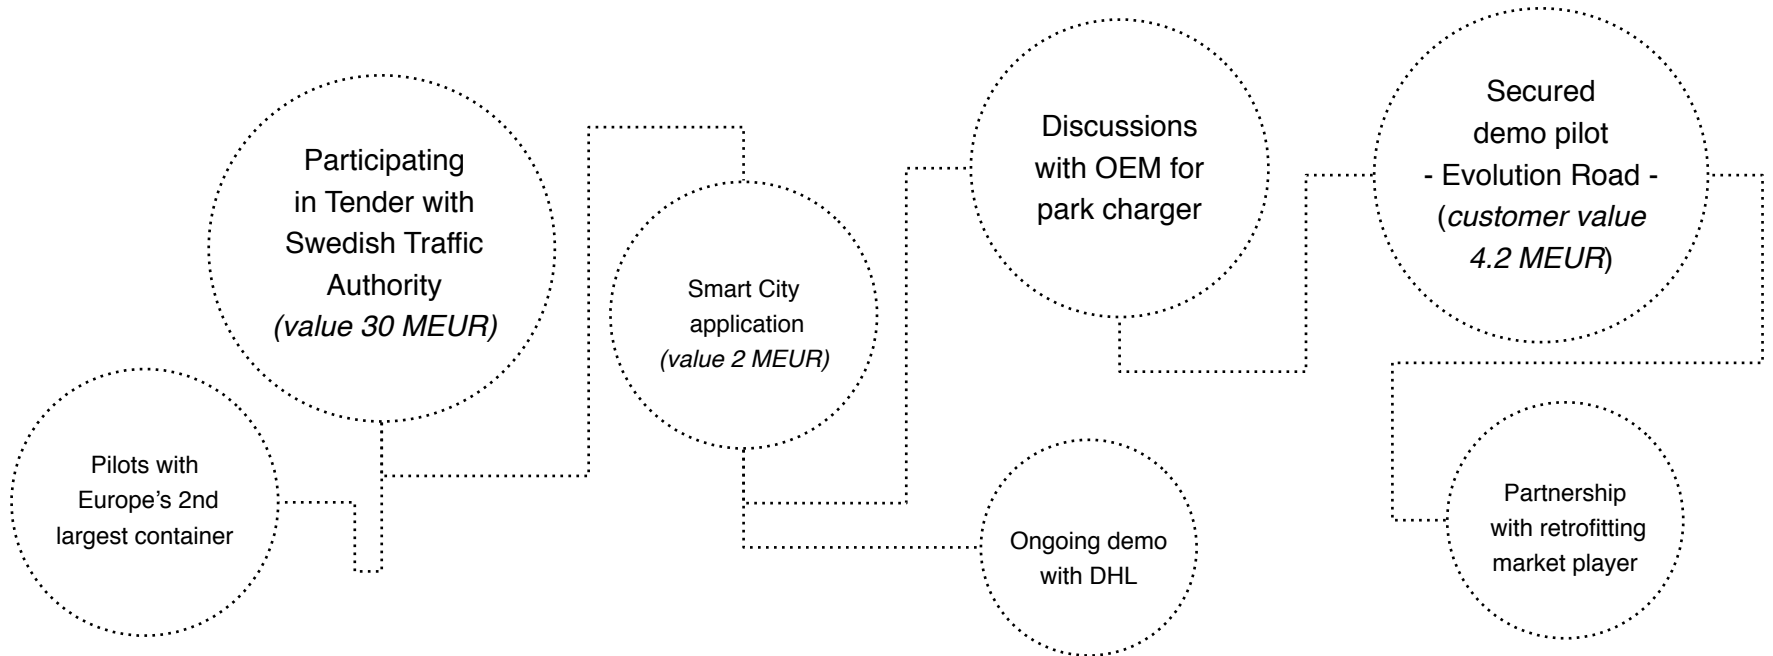

- Certification
- Commercialisation
- Communication

## Target

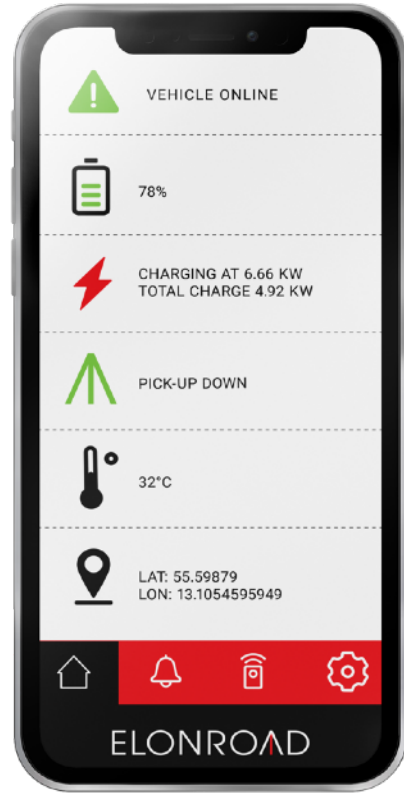

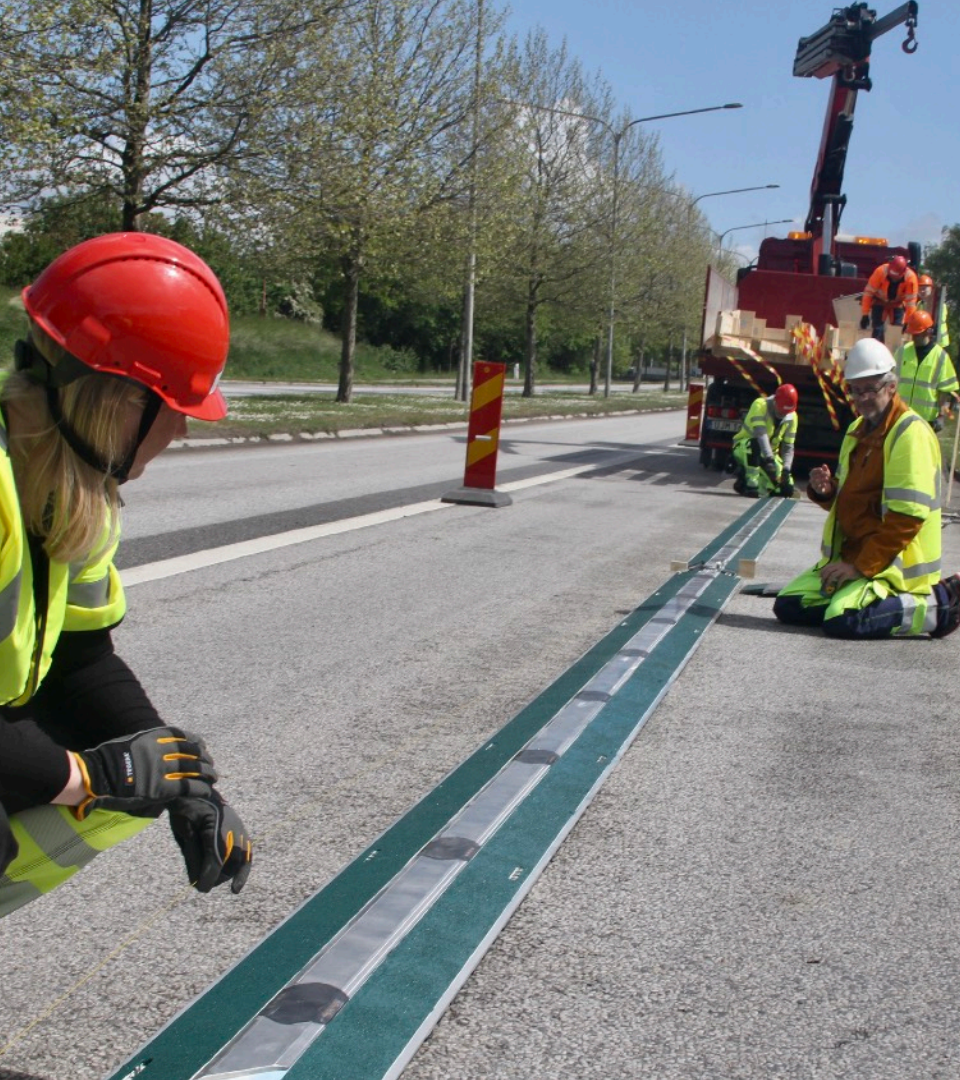

- OEM partnership
- First B2C automatic park charger
- Smart city pilot

# The journey has started!

We're already on the road to a greener and leaner future.

The perfect union of disruptive tech  
and traditional engineering.

# A team on a mission
