---

SOFTWARE AS A  
SERVICE PLATFORM  
THAT IMPROVES AND  
MANAGES ENERGY DATA

[sales@energsoft.com](mailto:sales@energsoft.com)

<https://energsoft.com>

Our primary asset is the competence and knowledge of our team. We've started from the very bottom, worked our way up to profitability

The undertaking of Energsoft Inc. is to empower transportation, energy storage, and consumer electronics market

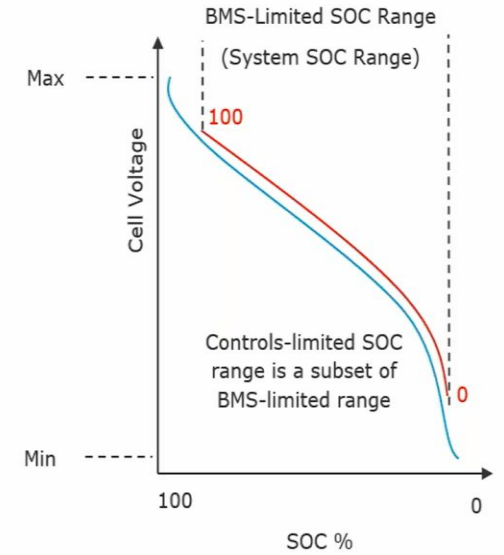

Energsoft enables businesses which are emerging, manufacturing, or functioning batteries and battery-powered systems to reliably deliver products in their looked-for market window with industry-leading performance

Energsoft is Combining Materials Science and Machine Learning to Improve Batteries by Increasing Routine, Shipping Products Faster, and Reducing Costs

# MISSION

# Usage Conditions and Testing Matters

# Testing, Certification & Standards

ACCELERATE BATTERY DESIGN AND QUALIFICATION.  
AUTOMATED KPI'S UNDERLYING CONCERNS QUICKER

100% TRACEABILITY. BATTERIES ARE CHECKED SEVERAL  
TIMES. A BAD BATTERY CAN KILL YOUR PRODUCT.  
BATTERY TEAMS ARE BEING ASKED TO DO MORE

ENSURE YOUR BATTERY PRODUCTS MEET  
PERFORMANCE, RELIABILITY, AND SAFETY COMPLIANCE  
REQUIREMENTS

STRICT SECURITY WITH CLOUD, ON-PREMISE OR HYBRID  
INSTALLATION TO PROTECT YOUR PRIVATE DATA WITH  
HIGH STANDARDS OF ENCRYPTION AND COMPLIANCE

# Prototyping

---

Receive faster market feedback to quickly test your ideas thanks to proved prototyping techniques and proof of concept in 2 weeks

Collect valuable feedback based on high-quality prototypes to test your hypothesis and iterate rapidly

**Agile:** Helps us optimize operations, lower issue rate by reducing inefficiencies, improve the development process

**Delivery:** Continuous and transparent, which allows you to be in control and feel a full-fledged member of a development process

# Research & Customizations

---

1. Find the most suitable technologies to your needs and make a solid foundation for your product relying on our 90 years combined R&D expertise
2. Research, technology consulting and software product development customization services for our platform to deliver your battery and energy storage product on time and within the budget.
3. Mining and Cleaning the data.
4. Get access to a perfect blend of modern solutions including IoT, hardware integration, artificial intelligence and everything in between to build the product you need.
5. Big Data Processing and Predictive Analytics, Real Time Measuring, Automatic Gathering, Aggregation and Analysis of distributed streaming data.

# Development

---

Let's start with research - our experienced R&D department will offer the most suitable technology stack to shape your product.

Be flexible to iterate while staying in control of building the launch-ready product with regular sprint and budget reports.

Control the development process using flexible system of communications, receive constant updates and evaluate weekly demos.

At this stage, we will create the project plan, specification document, and determine a required time and cost estimation

# Integration

---

Get on-going post release support to keep your products' efficiency at maximum like our partner is having for over years

Take your business to the smart level with credible insights, significant savings on maintenance and operations.

Build complex IoT solutions, like remote grid monitoring, notifications and reporting.

Multiple battery lab or field battery locations relying on our advanced, cross-domain expertise in Internet of Things/Intelligent Devices Development

# Pricing Model

## 3 Competitive Pricing Plans

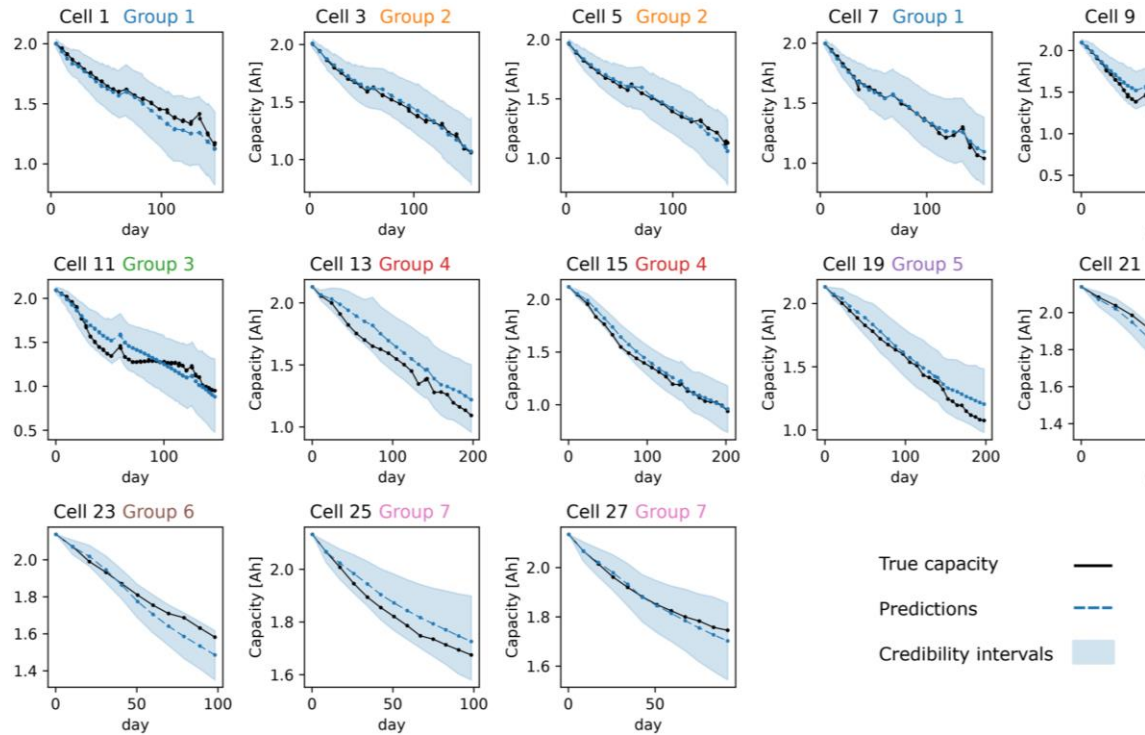

Sales taxes included in the price

Subscription as a Service is for one year and paid with (NET 30)

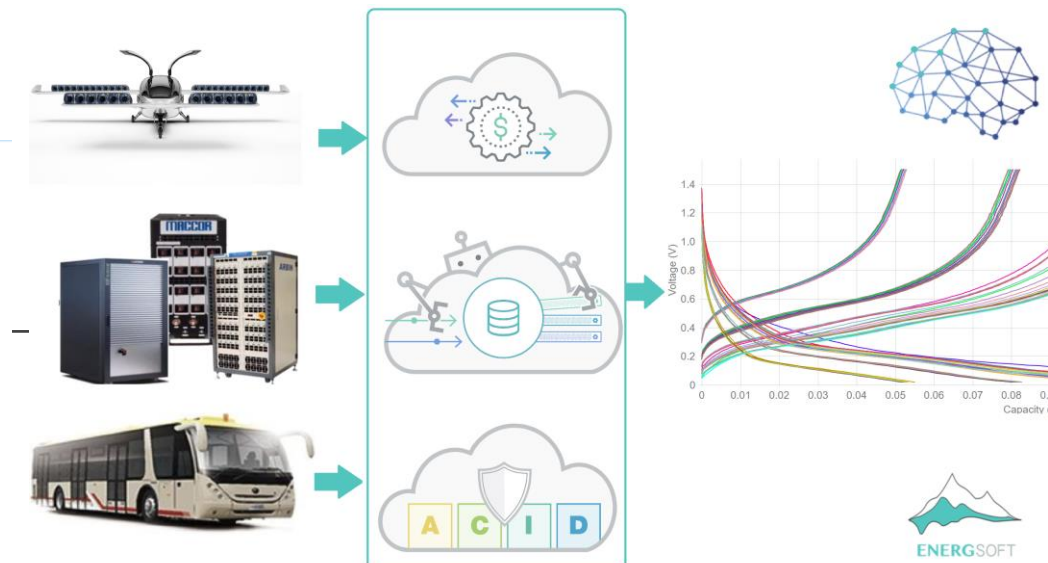

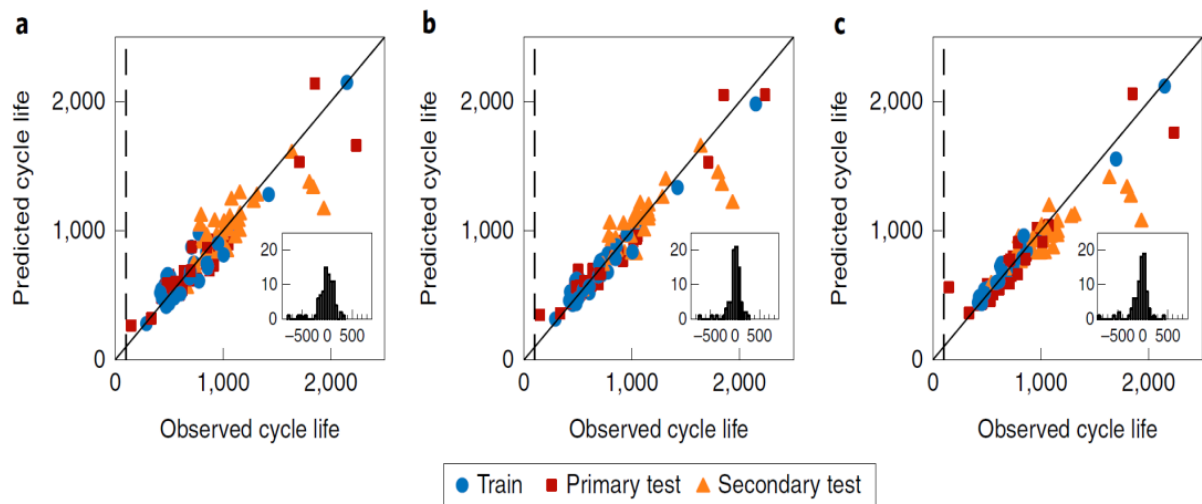

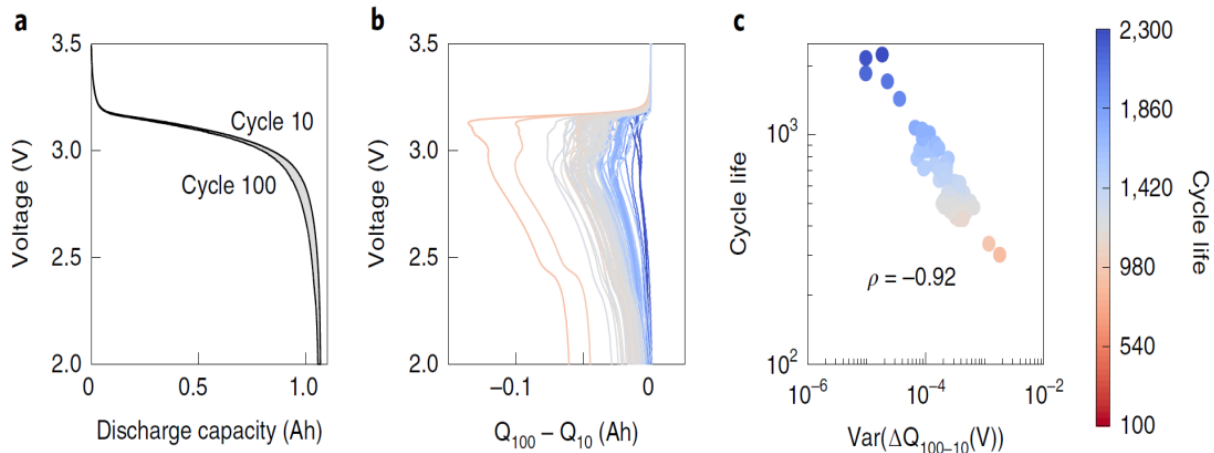

Free customizations are included in enterprise package & other options require additional payments

Free white gloving integrations for medium and enterprise models.

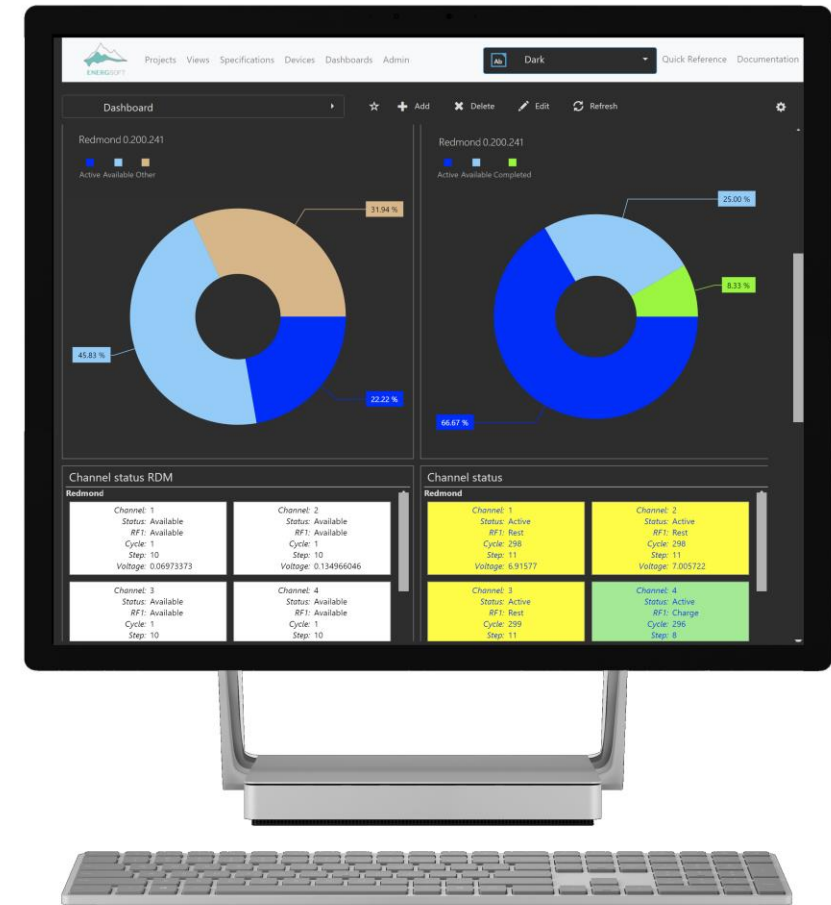

<b>\$2222/month</b> Starter	<b>\$4444/month</b> Professional	<b>\$8888*/month</b> Enterprise
Cloud Only	All Features From Startup and Hybrid Cloud	All Features from Professional and On-Premise
<50K projects	Active Directory Integration	>100K+ projects
Free Updates	<100K projects max	Customization Discounts
US Based Data Centers	Multi Year Discounts	Machine Learning Models
Remote Onboarding	Advanced Usage Reporting	Enterprise Grade Onboarding, Alerts & Training
Ticket Based Support	1:1 Support with Engineer	Team with Data Scientist
	No Energsoft Branding	

# State of the Art Machine Learning Models

- Materials & Production (Battery R&D)
- Certification & Benchmarking (Historical and Statistical)
- Field operation & Primary Usage (System Integration)
- End-of-life & Second Life (Warranty Returns)
- Prognostics & Prescriptive Analytics (ML & Artificial Intelligence)

# Customizable and Scalable Solutions within Budget and Time

ACCELERATE TESTING  
AND IMPROVE YIELD  
ANYWHERE ON EARTH

CONTINUOUS  
INTEGRATION WITH  
YOUR TEAM

STRONG EXPERTISE AND  
KNOWLEDGE WITH 90+  
YEARS OF PROJECTS

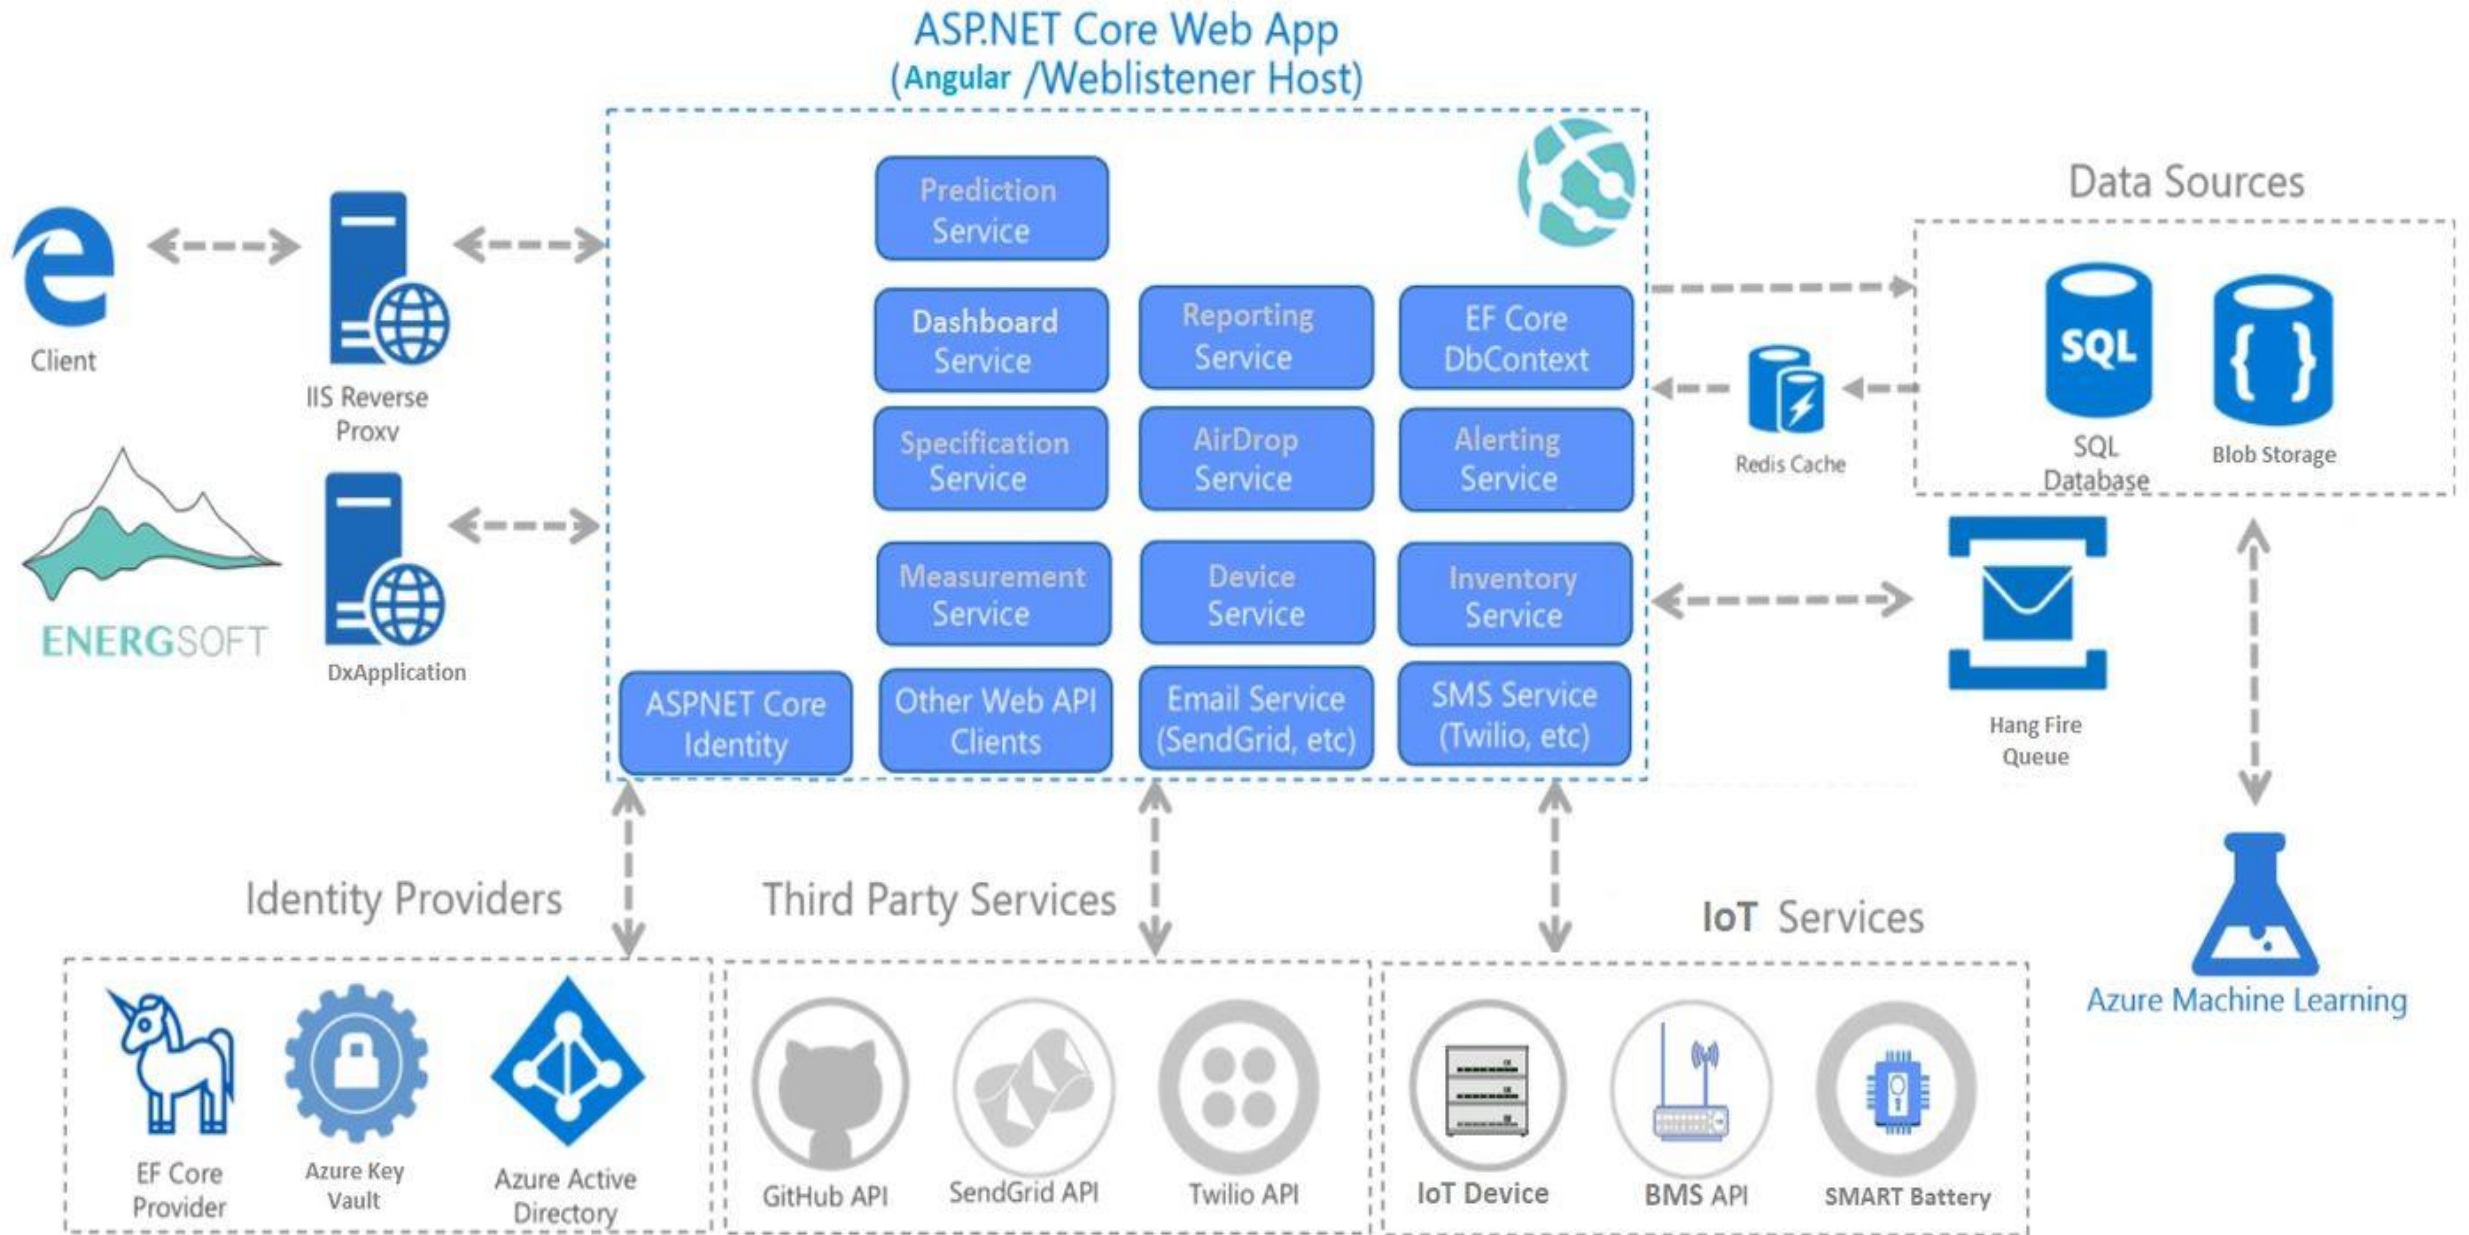

FREE SUPPORT

QUICK BUG FIXES

FREE UPDATES

# Testimonials

---

**CEO of Battery Company** - “We were in a hurry because we needed to impress our customers by writing proposals to those customers to expand the projects. We are to a large extent using the results of the analysis we produced by using Energsoft analysis platform.”

Manufacturer **Battery Scientist, PhD** : “By combining state of the art prognostics tools and software systems, Energsoft enhances your operations by highlighting the information you need to focus on. We are able to analyze, track, and even predict, what is going to happen and when.”

**OEMs Director** in S&P 500: “Energsoft Insight+ takes the mystery out of our critical infrastructure’s status by providing visibility into performance, allowing us to extend battery life, pick the best supplier and take action before issues occur.”

As we bring people of all lifestyles together, we keep on looking for the best and the brightest, capable of sharing the same vision. Everyone's opinion and perspective are welcomed, creating the result-oriented process.

Energsoft competence spans from initial Research & Development to bleeding-edge technologies, like Machine Learning and Big Data.
