SaaS Solution for Capillary and Last Mile Distribution

Customized Transformation

Road and street network, traffic flow, driving and urban goods distribution regulations, operators and available vehicles, are unique to each city.

The Last Mile Digital Platform© is the solution to evaluate different urban goods distribution models integrating all these elements, and objectively choose the most sustainable.

And to design, implement and day-to-day manage chosen model operating criteria (cooperation, co-opetition or competition), on private, public or mixed partnership.

Inclusive Transformation

The Last Mile Digital Platform© technologies break the digital divide.

Substantially improve quality of work and become a source of sustainable employment for the Social and Solidarity Economies.

Calculate and share environmental impact of each delivery, following a globally recognized methodology.

Solid Technology Base

The Last Mile Digital Platform© is modularly designed and architected.

Integrates easily with any other technology or information system.

Developed on state-of-the-art open standards that guarantee accessibility from any device through a single and secure API.

Validated by Microsoft and Honeywell as a safe, resilient and scalable Line of Business Application. Available in Microsoft AppSource and Honeywell Marketplace.
