# Compostable Single-use Garbage Bags

Why they're unsustainable

## **Takes from land that grows food for humans**

Currently only 3.8% of land on earth is used for growing food for humans. There's not enough land to be used for bioplastics\*

## **Decompose only in certain circumstances**

Only when placed into a home compost or be processed at special industrial composting facility

## **When in landfills they release methane**

Methane is a greenhouse gas that is at least 28 times more potent than carbon dioxide

# Now Is The Right Time

Deloitte Global survey of Millennials and Gen Zs

## **Climate change dominates concerns**
