

Uplift Solar Corp.

Solar Power Innovation

Patent: <https://bit.ly/high-freq-cellstring>

More power at lower upfront cost

Our DC-DC converter handles all of the functions of solar panels at a fraction of the size and at a lower upfront cost too. That includes maximum power point tracking, fire safety features, as well as per-panel performance monitoring.

Laminated Inside

Our long-term durability is greater, since we are 100% environmentally isolated, by being laminated inside the solar panel.

Patented Technology
